WHO WE ARE...

Corvette Central has been a leading manufacturer and distributor of Corvette parts and accessories since 1975. In 2001, we moved into our current facility which included the implementation of an automated order picking system. This allows us to better control inventory and to pull orders efficiently. In 2004, we added on a new manufacturing facility where we produce 4,000 of the over 60,000 parts we sell.

Corvette Central is proud to offer the most comprehensive and detailed parts catalogs on the market today and produces a different catalog for each Corvette generation. All catalogs are also online with full search and order features. From the first V8 to C8, only Corvette Central has it all.

Order 24 hours a day, 7 days a week on our secure website with current pricing and availability.

LiveChat is available on the website, Mon-Fri 10am-3pm

ORDER BY FAX

269-426-4108

Fax orders can be placed 7 days a week, 24 hours a day.

ORDER PICK UP

Corvette Central
13550 Three Oaks Rd
Sawyer, MI 49125

Monday - Friday: 9am-4pm

Please call to place your pick-up order at least 24 hours in advance. Current Michigan sales tax will be added to all orders picked up.

PAYMENT METHODS

We accept all major credit cards. For online orders, we also accept PayPal.

Corvette Central meets the thresholds for many states that have passed sales tax laws/regulations and is now required by state law to collect and remit sales tax on purchases made by individuals in those states.

DEALER WHOLESALE PROGRAM

We offer a wholesale program based on the amount your company purchases annually.

To Qualify:

- You must be an auto related business
- Your business needs to have a current sales tax license from the state(s) in which you do business.

Please go to corvettecentral.com/wholesale for more information and the application forms.

START TO FINISH

Our Start-to-Finish Program offers our customers doing a partial or complete restoration the best price, service, and selection for their project needs.

- Orders placed will receive a 5-15% discount on most items.
- Maintain your preferred customer status by spending only \$500 per year.
- To enroll, please inquire with our order department and place an initial order of \$2500 or more. The initial order will receive the Start-to-Finish discount.

MILITARY DISCOUNT

Corvette Central extends our gratitude to those military members who have served and those in active service to our country. As a token of our appreciation, Corvette Central offers a 10% discount to all current and former Military customers. Please send your email request to customerservice@corvettecentral.com along with a copy of your DD214 form or some other proof of service to enroll.

NOTE: All pricing and discounts are based on current list prices and are subject to change without notice. You may not combine any discount with any other offers or programs.

***(ND) - NO DISCOUNT - A (ND) within the description of a product means there is no discount available, regardless of any offer.**

PRICE MATCH GUARANTEE

Corvette Central will match any Corvette Competitor's current advertised price on an identical product. Simply send us a copy of the competitor's catalog or ad showing the current advertised price. The product must be from the same source or vendor.

Note: This does not include sale prices or web specials. Cannot be combined with any other discount or special offer.

We are the Caretakers of the Legend, and the Legend is Quality.

Corvette Central has been a leading manufacturer and distributor of Corvette parts and accessories since 1975. We know that your Corvette is important to you, and you will only put parts on it that look good and work right. That is why our quality standards are so high. If we wouldn't put it on our Corvette, we won't offer it.

Our manufacturing facility produces 4,000 of the over 60,000 parts we sell. We are proud to offer the most comprehensive and detailed parts catalogs on the market today and we offer a different catalog for each Corvette generation. All catalogs are also online with full search and order features. From the first V8 to C8, only Corvette Central has it all.

The Customer Service team is available to take and assist with any questions you may have regarding your order. For questions about the parts, our Product Assistance team has a vast library of knowledge to answer your questions.

We are in contact with our suppliers every day for updates so that we can maintain good communication with you, our Valued Customer. We've been doing it since 1975 and we will keep doing it to keep the Legend going strong.

SHIPPING INFORMATION

SHIPPING & PACKAGING CHARGES

Pertaining to orders shipped within the continental USA: Ground service freight charges for your entire order will be charged at the time of the first shipment. Any backorders shipped after the initial shipment will not incur any additional shipping charges.

Small packages are sent by U.S. Postal Service Priority Mail. This service is the fastest and most economical for this size package. The U.S.P.S. delivers to the continental United States, as well as Alaska, Hawaii, Puerto Rico, U.S. Virgin Islands, and military addresses (APO/FPO) Monday through Saturday.

Larger packages will be shipped by regular ground service by UPS or FedEx. Ground service delivers to a large section of the U.S. within 3 days from our location. We also offer Next Day, 2nd Day, and 3 Day air delivery services. Saturday delivery service is only available with Next Day air charges for an additional fee.

OVERSIZED SHIPPING CHARGES

Some products have additional shipping charges due to heavy weight or oversize dimensions.

RUSH SERVICE

If you need your order processed and shipped the same day, we offer "RUSH" service. For an additional \$5.95, any order received before 1:00 PM ET will be processed and shipped that same day. Orders received after 1:00 will ship the following business day using the "RUSH" service.

NOTE ON UPS SHIPPING CHARGES

Changes recently made by UPS have impacted shipping costs. UPS no longer uses actual weight of packages to calculate shipping. They now use "dimensional weight" of packages. We measured every product we sell and entered that information into our system. This enables our system to calculate the size box/boxes your order will ship in and calculate the shipping costs when the order is placed. Retail customers pay shipping for entire order on the 1st shipment. Corvette Central audits the calculated shipping charges after each order is complete. If we have overcharged you, we will automatically send you a Merchandise Credit for that amount you overpaid. Currently this is the best way to be fair to our customers.

BACK ORDERS

Due to the wide variety of specialty products we distribute, back orders are unavoidable. We automatically ship back orders when they come in stock. If you wish to cancel your back order, please call, email or chat for a cancellation number.

Canada

CANADIAN SHIPMENTS

Corvette Central ships to Canada via UPS exclusively. UPS and Corvette Central entered into agreements with the Canadian government in order to collect and remit all duties, taxes and brokerage when your order is processed and shipped. This allows you to know the total cost of your order to be delivered to your door, at the time your order is placed. There are no hidden charges! The exception to this program is Prince Edward Island. Orders shipping to this province will be processed through a Canadian brokerage house. We cannot ship truck freight items to Canada.

INTERNATIONAL ORDERS

We ship Corvette products to every corner of the globe. There are many variables, depending on size of order, location and timing. Please contact us by email for the most efficient and economical means of shipping your order. Due to recent changes in VAT rules, we require a minimum order of \$150.00 for customers shipping to the EU.

TRUCK FREIGHT

Parts in this catalog noted with "T" for Truck Ship and any other item exceeding carrier size or weight limits will be shipped by truck. All items being Truck Shipped must be prepaid or charged to a credit card.

IMPORTANT - INSPECT ALL PACKAGES IMMEDIATELY!!!

All damages, shortages, or errors must be reported within 7 days of receipt of package. Please have invoice ready when you call. See the back of your invoice for a complete list of Return Policies and Procedures.

DAMAGED ITEM — SHIPPING RELATED

- If there appears to be any external damage, i.e. crushed or dented side or corner, any tears or holes in package, immediately inspect contents of package for parts damage. If damage is found, **DO NOT CONTACT THE CARRIER. IMMEDIATELY CALL CORVETTE CENTRAL AT (800) 345-4122 to report any damages.**
- Do not destroy the package or box that the item shipped in. Please save it for inspection by the carrier.
- Have the package and invoice with you when you call.
- If a claim is filed, arrangements will be made for pickup of package with entire contents.

NON-SHIPING RELATED

Call us at 800-345-4122 immediately with description of damage and we will process a replacement and make arrangements for pickup of damaged item.

SHORTAGES AND MISTAKES

Call us at 800-345-4122 immediately and we will process an exchange or replacement as required.

RETURNS

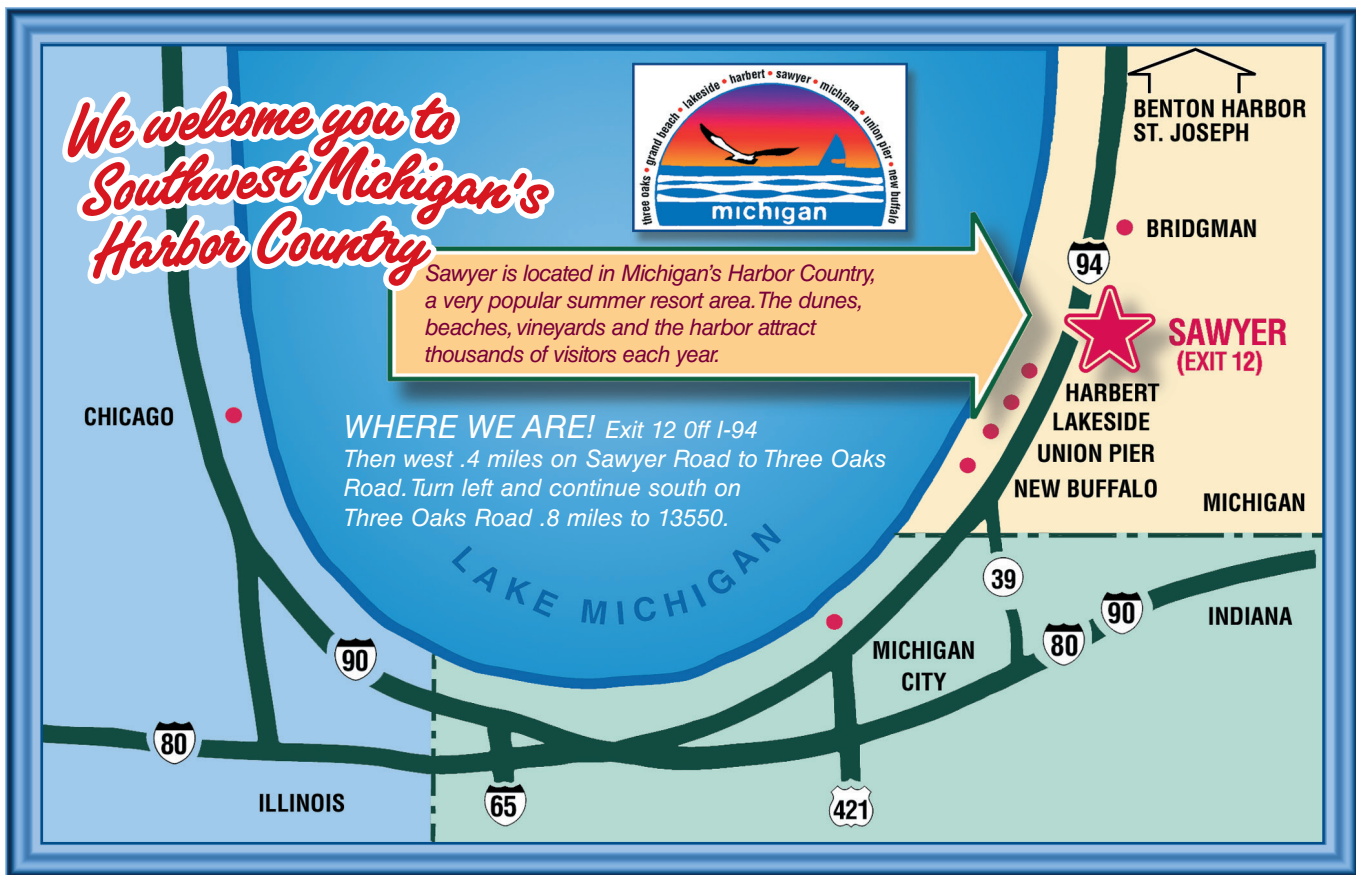

- There is no need to call for authorization. Fill out the return slip enclosed with your shipment, and send the package back to us. It is recommended that you insure the package and retain your receipt of shipment. Items must be returned in the original packaging for credit.
- All returns must be made within 60 days of invoice date. After 61 days a restock fee will be charged.
- No returns on electrical products or tools.
- Items that have been installed, altered, damaged or are otherwise not in a condition to be resold will be returned to the customer at their expense.

REFUSED SHIPMENTS

Shipping and handling charges on refused shipments are the responsibility of the customer.

CD Shop Service Manuals

Format: CD-Rom

The Chevrolet Shop Manual Set CD are the original manuals used by Chevrolet mechanics to guide them through repairs and maintenance. Each manual provides information on operation of major systems, diagnostics, troubleshooting, overhaul, as well as removal and installation of major components. Written in an easy to understand format, this manual contains step-by-step instructions designed for the novice and the expert. In addition, these manuals are filled with illustrations, photographs, and diagrams that help in the identification of parts and proper assembly.

Important Note: Works with either PC or Mac. Adobe Reader 7.0 or higher is required.

Corvette from the Inside

Author Dave McLellan was chief Corvette engineer from 1975 until his retirement in 1992. He has written a book following the development of Corvette as seen from his unique vantage point inside GM. Dave knows what it took to build the best American sports car possible. He shares his insights into the Corvettes that came before him as well as the forces, climate and people who shaped the Corvette. Includes archival photos from GM, original sketches by McLellan, and photos from his personal collection. Hardbound. 285 pages with 200 plus black and white photos.

104663..... 51.45

Corvette Fuel Injection & Electronic Engine Management

This book is a hands-on guide to understanding, servicing and modifying your Corvette electronic engine management system. The heart of the Corvette is its' electronic engine management system, and this book explains that system. It covers fuel injection systems from 1982 L83 to ZR1 through 2001 LS1. Included are 112 pages of model specific wiring diagrams, trouble codes and test specifications along with hundreds of GM photos

and illustrations. If you have an interest in electronic fuel injection systems, author Charles Probst makes these systems easy to understand. 8 1/2" x 11" softbound, 380 black and white pages.

114083..... 75.70

1953-2023 Corvette Black Book

The gold standard in Corvette reference! New and greatly expanded with even more facts and figures up to 2023. Includes production figures by color, more option figures, expanded engine data, block and head numbers, and month of production. 160 pages with 71 photos. 4-3/8" x 10". Softbound.

111930..... 21.60

84-96 Body Repair CD

If you or your body shop are going to make fiberglass repairs to a 84-96 Corvette, then these two books on CD are required reading. Both books are written to guide the reader in techniques used for fiberglass repairs and panel replacement specifically for C4 Corvette. Written in a step-by-step format for both the do-it-yourselfer and the professional, these books include detailed photos and illustrations to clarify every step.

Front end repairs are covered in Volume 5 - 128 pages with more than 225 large black and white photos. Repairs to the rear of the car are covered in Volume 6 - 160 pages and over 229 large black and white photos and illustrations.

114046	Front Body Repair CD Volume 5	48.70
114021	Rear Body Repair CD Volume 6	48.70

How To Build Max Performance LT1/LT4 Engines Book

- Specifically address performance modifications for the LT1/LT4 Engines
- LT1/LT4 engines powered Corvettes, Camaros, and Impala SS cars from 1992 to 1997
- LT1/LT4 engines are an excellent and affordable platform for major performance improvements

This book investigates every component of the LT1/LT4 engines, discussing their strong and weak points and identifying characteristics. Upgrades and modifications for both improved power production and enhanced durability are described and explained in full. All relevant factory casting numbers are listed. Aftermarket component upgrades for improved street and track performance are defined clearly and in great detail.

Softbound, 8.5" X 11". 136 Pages

297 Black and white photos

High-Performance Chevy Small-Block Cylinder Heads Book

by Graham Hansen

Any professional performance engine builder will likely tell you the most powerful and important components in an engine are cylinder heads. High-Performance Chevy Small-Block Cylinder Heads shows you how to choose the best cylinder heads for your application. It covers both Gen I and Gen II small-block Chevys, occasionally touching on the Gen III and Gen IV engines. The book taps into some of the best small-block Chevy cylinder head resources this country has to offer to distill valuable information on port design and airflow management.

This book is designed exactly like its predecessor, High-Performance Chevy Small-Block Cams & Valvetrains, in that it starts with the basics and works into more in-depth concepts and variables in an attempt to uncover all those subtle nuances that make power in the small-block Chevy.

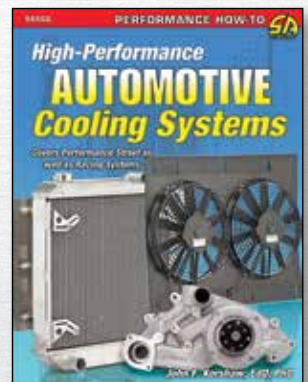

111065	38.90
---------------------	-------

High-Performance Automotive Cooling Systems Book

In High-Performance Automotive Cooling Systems, author Dr. John Kershaw explains the basics of a cooling system's operation, examines coolant and radiator options, explains how to manage coolant speed through your engine and why it is important, examines how to manage airflow through your radiator, takes a thorough look at cooling fans, and finally uses all this information in the testing and installation of all these components. Fast-forward to today, and it's easy to forget that C4-C8 Corvettes even have coolant. The temp needle moves to where it is supposed to be and never moves again until you shut the car off. Whether you are a fan of modern performance cars or a fan of more modern performance in vintage cars, this book will help you build a robust cooling.

WARNING

Do not use harsh detergents when washing car covers.

INCLUDES FRONT AND REAR EMBROIDERED LOGOS

Mosom Plus

Best for Outdoor Use

Mosom Plus

Mosom Plus™ is a four layer material. The outer two layers are Spunbond Polypropylene, the middle layer is a special micro-porus film and the inside layer is super-soft fabric. The middle layer is an excellent rain barrier, while allowing for vapors to pass through. The special cotton flock inner layer pampers the most delicate paint finish. It is a great choice for all-around car cover use, suggested for most conditions except extreme sun, snow or ice. Mosom Plus™ is a non-woven material, so in the unlikely event a rip occurs in the material, it will not run.

104803 84-96

ONLY \$214.20 EACH

Best for

Indoor Use

Gray Flannel Lined

- Softest Indoor Protection
 - Brushed Lining Guards Your Corvette's Precious Paint
 - Treated to Resist Rot and Mildew Damage
 - Custom Fit with Mirror Pockets and Front and Rear Elastic Hems
- Traditional Flannel Car Covers are a top choice for C4 Corvette owners who store their car indoors. Heavy Gray Flannel keeps finish clean and protects from minor bumps and scrapes. Features no-scratch tie down grommets.

104005 84-96

ONLY \$232.25 EACH

SILVER GUARD

Best for Outdoor Use

Silverguard Plus™ Car Cover

INCLUDES EMBROIDERED EMBLEM

- Silver-Tech polyester material.
- Fleece Lining
- 150 Denier woven polyester, coated with aluminized polyurethane and acrylic.
- Soft and non-abrasive to clear coat finishes.
- Protects from UV rays.
- Will not absorb water like some perforated covers.
- Nearly waterproof, yet breathable.
- Extremely lightweight and yet extremely protective.
- Grommets for cable lock.
- Snug fit all the way around.

104475 84-96

ONLY \$214.20 EACH

The Lower

Cost Alternative

Trigard

Coverking has comprised Triguard out of three layers and each layer is treated with UV retardant to ensure your Corvette is protected against the sun's rays. The middle layer of polypropylene goes through a melt-blown procedure, which means that it is heated and rolled so that it is water-resistant. The middle layer is then inserted between two layers of Spunbound fabric, which means it is compressed in a way to allow breathability in return preventing mildew and rot build up. Triguard's material is easy to clean, store and even though it is light weight, it will not make your wallet light.

104807 84-96

ONLY \$128.65 EACH

All covers have a scratch-proof grommet built in for the optional safety lock.

NOTE: Antenna holes will have to be cut into covers.

114018 Moda Black Stretch Car Cover with C4 Emblem 194.65

84-96 Stormproof Car Covers with Emblem

Stormproof material is the most waterproof yet breathable car cover material available. Stormproof car cover material exhibits outstanding sun and U.V. resistance. The micro-fiber base material is soft to the touch and won't scratch a car's paint – yet it rolls up into a very compact package for easy storage. Stormproof is available in 3 colors with Licensed GM Logos.

Stormproof accomplishes the needs of a premium Car Cover material without the coatings which can easily wear off, the treatments which fade over time, and the processing which can be undone the first time it is exposed to water.

Stormproof is immune to this, because it is inherently water resistant. And the fibers have been designed to reflect UV rays, and be immune to the color fading caused by the harsh sun. Stormproof is the only Car Cover material we can suggest for any climate or car cover need – it excels in every area except protection from dings and hail. Stormproof will last for years, and compliment your vehicle with the exciting two-tone designs it is offered in.

104877	Gray	289.95	104680	Yellow and Black.....	347.10

Autobody Armor Car Cover

Autobody Armor is made from two outer layers of strong latticed polyester that sandwiches a middle layer of thermoplastic polyurethane. The combination of these three layers bestows your legend with the best water resistance out there and excellent breathability. The Autobody Armor also offers your Corvette UV protection by treating each layer of the cover with UV inhibitors. In addition, similar to its indoor counterpart Satin Stretch, the Autobody Armor is also highly stretchable. It hugs the curved contours of your Corvette. Its silk like softness provides good protection against moisture, dents and scratches while making it easy to handle as well.

114512 84-96

ONLY
\$377.20
EACH

Stretch Satin™ Custom Car Cover

Coverking's Stretch Custom Car Covers are made for vehicles parked indoors (it will fade if exposed to extended sun, and is not water resistant), and for owners who want nothing but the best for their vehicle. Satin Stretch is the SOFTEST fabric available. The material has Lycra fibers for stretch in both directions, mirroring every perfect contour of your vehicle. And the inner liner is the softest fleece you will find specially designed not to rub off on convertible tops. It is available in solid color designs, including Black, Steel Gray, Dark Blue, Yellow and Red. Blind stitching results in invisible seams-this is a HOT car cover.

84-96 INTERIOR PROTECTION BY

Sunroof Headliner – See Page 157

Cockpit Cover

With Top Down!

The right way to protect your convertible top and rear window from the sun's UV damage and nature's stains when your top is up! It also blocks the sun and reduces interior temperatures. This vinyl cover sits on top of the original top and attaches to existing body hardware. Conveniently folds for compact storage.

104019..... 244.95

Top Hat

With Top Up!

Keep your convertible's interior cool, dry and dust free when your top is down. Good protection from water. Installs in seconds; requires no modification. Made of heavy-duty vinyl.

104040..... 229.95

84-96 Coupe Sunjacket/Sun Shade Cover

Heavy-duty denim backed vinyl and easy to install, the Sunjacket covers all windows and the top of 1984-1996 C4 Corvette coupes. Reduces interior temperatures up to 40 degrees in 90 degree weather. This cover catches under the rear hatch window, and hooks to hood edge and door handles, no cutting or drilling holes required
NOTE: These are now made of an improved material that is a khaki color.

104049..... 254.95

Rain Coat™

When the wind in your face turns into rain drops, be ready for it in seconds. The Rain Coat is easy to handle and installs quickly using tight grip velcro on the windshield header and rear targa sections of your cockpit. Makes a snug and waterproof fit with no alterations to your Car. Double wall construction of black canvas. Folds neatly into storage pouch when not in use. Will hold securely at legal highway speeds.

Adam's Graphene Ceramic Spray Coating & Detail Spray

Protect all the hard work you put into the finish on your Corvette with this amazing product. Keep that showroom shine!

112533 Spray Coating33.95
112579 Detail Spray15.40

In & Out Spray

Watch your faded and dull trim go from boring to brilliant with a single treatment of one of our all time best products.

An aerosol spray dry to the touch within moments and still capable of restoring your faded and dull plastic, rubber, and vinyl trim to like new condition with just a single spray. Use this amazing product on all the hardest to reach areas, like air conditioning vents, wiper cowl, grilles, and even under the hood to dress your engine compartment.

In & Out Spray wipes easily and cleanly away from surfaces like glass and paint so there's no need to stress about over-spray getting into areas you don't want. One swipe of a plush microfiber towel and the over-spray residue is gone!! There's never been an easier way to dress your trim than In & Out Spray guaranteed to impress you every time you use it.

102606 Aerosol15.40

Invisible Under Carriage Spray

Adam's developed this special product to make your wheel wells and under carriage completely invisible. Spray after a wash and before detailing for best results. You'll love the low-gloss, dark finish that this Invisible Under Carriage Spray leaves behind. Guaranteed to please.

104845 16 oz.13.35

Brilliant Glaze

Adam's Brilliant Glaze takes personal reflection to a new level. This liquid glaze adds depth and clarity to chrome, glass, and paintwork. Brilliant Glaze is a top seller for its extreme ease of use and for its ultra-high gloss results. Product can be used in direct sun and has no dust. Shake well before and during use. Product separates by design. Not for use on oxidized finishes.

102768 Bottle25.70

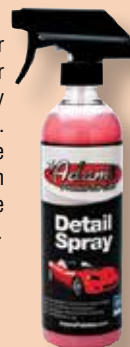

Detail Spray

This "Best of Show" winner is a favorite at car shows. Use as a waterless wash, a clay bar lubricant, or to enhance the depth and clarity of paint, chrome, plastic, aluminum, and glass. Specially formulated lubricants gently remove dirt, smudges, and grime, leaving surfaces with a smooth, ultra-high gloss finish. Use in the sun or shade, and in hot or cool temperatures.

102284 16 oz.13.35

106802 Gallon46.30

Buttery Wax

Leading the charge in technological advances, Adam's Butter Wax is formulated with a special blend of polymers, resins, and natural Carnauba. Butter Wax contains no cleaners or abrasives, and will not stain plastic or rubber. Always treat an imperfect finish with Clay Bar and Polish before applying Butter Wax.

104685 16 oz.20.55

Adam's Strip Wash

Adam's Strip Wash is a concentrated soap blend that removes any wax and sealant protection as you clean your ride, preparing it for paint correction session with a machine polisher or hand polish, or to start clean with a fresh layer of sealant or wax.

102948 16 oz.15.40

V.R.T. (Vinyl, Rubber, Tire)

Enhance and protect the appearance of plastic, rubber, tires, moldings, dashboards, and door panels. Adam's V.R.T. contains no harmful silicone or alcohol. The thick moisturizing cream applies easily with a sponge and will not leave a greasy film, attract dirt, or harm paint and glass. Added U.V. protection keeps vehicle interiors and exteriors looking and feeling like new.

Wheel and Tire Cleaners

Adam's Tire and Rubber Cleaner

Adam's Tire and Rubber Cleaner deep cleans tires and removes baked on tire dressing, blooming, and discoloration. It effectively removes oxidation, wax, and polish residue from rubber and plastic trim parts as well.

112617 16 oz. 13.35

Adam's Eco Wheel Cleaner

- Direct-Release to the Environment Approved
- Powerful cleaning capability with a pleasant citrus scent
- Thin formula allows for a wider working area
- Breaks down brake dust, road grime, and dirt
- Safe on painted, powder-coated, anodized, clear coated, and chrome wheels

Adam's Eco Wheel Cleaner is an environmental friendly wheel cleaning solution. It is pH neutral formula that is Direct-Release to the Environment Approved and breaks down road grime and wheel contamination.

111598 16 oz. 13.35

California Micro Fiber Wheel Duster

Micro Fibers effectively trap dust and dirt

- The "fork" easily spreads when pushed on an object for true one-handed convenience
- It "clamps" around the object to clean both sides at the same time
- Can also be used as a conventional duster on any surface
- Easily cleaned to allow repeated use time after time

Use to remove annoying brake dust and much more! Also great for roof racks and automotive grilles and can be washed and re-used hundreds of times.

101948..... 16.10

Tire and Wheel Brush

Get all of the nooks and crannies in your wheels and tires clean with this brush. Soft and natural tampico bristles and angled head design take some of the struggle out of the chore.

101228..... 11.40

Adam's Wheel Cleaner

- Safe on painted, powder coated, clear coated, and chrome wheels
- Thick gel-like viscosity clings to wheels for excellent cleaning power
- Dissolves brake dust, road grime, and dirt
- Color changes to purple as it's working

Adam's Wheel Cleaner is the most high-performance wheel cleaner you've ever tried. It is a pH neutral formula that specifically targets iron and metallic particles left behind by today's modern brakes

101875 or 101917 Ramps

101907 Roll Ups

These race ramps are unique in their design. They are made for low ground clearance performance vehicles with a gross weight handling of 1200 pounds per ramp or 2400 pounds per set. They are specially designed for the Corvette enthusiast, allowing you to get under your car quickly, safely and without any frustrating hassles. Constructed in one solid piece, Race Ramps will not slide across your garage floor, dig into your asphalt driveway, or scratch or otherwise damage your cement or painted floors. They can be used to raise your car up eight inches. You get all of this in an unbelievable lightweight of 20 pounds a pair. Most ramps can only accommodate a tire width of six to eight inches. Race Ramps are not hollow in the center or made with questionable reinforcements. They are 100% solid on all sides and constructed in one solid piece - giving you the non-skid support that you need. The ramps come complete with straps for easy carrying, and you can also use them to hang the ramps on the wall when you're done.

85-96 Vortex Rammer Cold Air System

- 15-17 Horsepower Increase
- 5 MPH & 3.5 Tenths in 1/4 Mile
- Replaces Stock Air Box

This vortex rammer kit replaces the restrictive stock air box assembly. This revolutionary air cleaner contains an internal vortex velocity stack. It obtains cool, pressurized air from the radiator cavity through your modified shroud. The specially designed scoop then forces it into our rammer sealed box, where in turn, it directly injects cold air into your intake.

(Lowering Manifold Air Temperature by almost 20 degrees). The radiator shroud requires a simple cut-out on all installations. Installation hardware and instructions included.

--------	------	--------

Green High Performance Air Filter

• Lifetime Guarantee

Improve performance – go Green! As in Green Filter USA. The flow difference between paper and oiled cotton may not be much when both filters are brand new, but a few hundred miles later it can be significant (as paper loses efficiency once dirty). Green filter's precision pleat geometry traps 20% more contaminants while optimizing airflow into the engine.

154110	85-89	66.95

MAT Sensor Relocating Kit

Help your MAT sensor keep its cool and gain horsepower!

The MAT sensor's stock location subjects it to a great deal of heat and can cause a loss of power due to incorrect readings. In just 30 minutes, the MAT Sensor Relocating Kit allows you to move the sensor to where it will read cool ambient air temperatures. This is a plug-in kit, no wire cutting. Comes with plug-in harness, plugs, grommet, and wire ties. Full instructions included. This kit includes a bracket to allow you to relocate the sender to a cooler location.

304292	85-91 Rectangular Plug	62.90
304006	85-91 Mushroom Plug	62.90
304710	90-96	58.60

85-96 Performance Modified Air Filter Lid

More Air Flow = More Power

Works with standard air filter — works better with K&N high performance filters! If your Corvette's engine cannot get enough air flow, it cannot make

maximum power, no matter what you do behind the air cleaner. You get a minimum of 40 CFM improvement in flow. Works great on stock engines, but is a necessity on modified, high performance engines. No modification, bolt-on installation.

154568	85-89 Black-Plastic	64.85
154115	90-96 Black-Plastic	59.55

Maximum Air Flow Package

Includes 1-Modified Air Filter lid and 1-K&N Filter. Simple installation, will gain 3-5 Horse power.

154564	85-89	119.10
154511	90-96	140.70

Stuck Antenna?

If your Power Antenna does not retract all the way, you may be able to use WD40 or cooking oil on the mast to help lubricate, this may help from having to replace the antenna.

164026 88-89
164035 93-96
POWER ANTENNA

Note: During the years 1988-92, GM used both Harada & ACDelco antennas. Harada antennas can be identified by a rubberized sheath around the motor; ACDelco's are without a sheath

PLEASE NOTE

Electrical components such as power antennas, battery cables, etc. are

NON-RETURNABLE PARTS

Always refer to a factory service manual when diagnosing engine service problems. You can damage electrical components if the proper procedures are not followed. Be sure you are replacing the correct part.

84-87 Power Antenna - Except CB

C4 Corvette Electric Power Antenna Reproduction. Plug and Play with Correct Harness Mast has correct finial and appears "OE". Motor assembly uses modern components and works correctly with low amp and includes a protective boot.

164027..... 169.95

Power Antenna Heat Shield Wrap

Your Corvette's power antenna motor is mounted near the high-heat area of the muffler, often causing premature failure of the motor. Prevent melted wiring inside the motor and accelerated wear with our Antenna Heat Shield. This shield will help you avoid the high cost and headache of antenna replacement due to heat damage! Simple Velcro mount, no need to remove antenna motor.

163004 Heat Shield Wrap..... 27.00

Is your Power Antenna sticky or noisy?
Replace the mast with our Mast Repair Kit.
NOTE: Antenna assembly must be removed from car.

Power Antenna Mast Repair Kit

Most power antenna units are needlessly replaced when a less expensive remedy could cure them. If the motor on your power antenna is still functioning, but your antenna mast is bent or broken, simply install a new mast. Kit includes complete instructions. Please note: masts broken off inside the motor are not replaceable — entire antenna must be replaced.

163077 84-87 (Note: This repair kit is for original GM antennas, it may not work in replacement GM/Delco antennas.) 49.95

164042 88-92 49.95

164037 93-96 64.85

Hide-Away Antenna

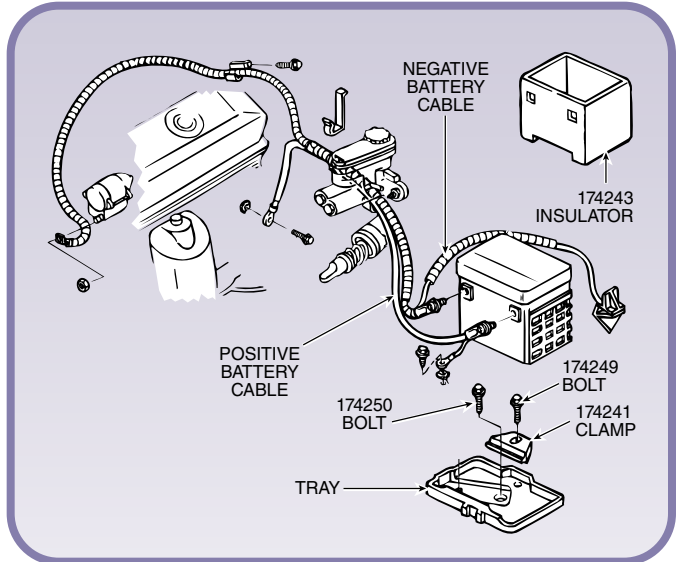

For the best AM/FM reception, nothing works better than a 31" vertically mounted antenna mast. Recognizing that application is impossible on some vehicles, our improved amplified antenna is the next best thing. Mounts on the inside top of windshield for best performance. Note radio signals cannot penetrate metal. Do not attempt to hide under the dash. Requires 12 volts.

How To Replace Your Battery Instructional Video

Or Search "C4 Corvette Cutaway Replace Battery" on YouTube.

Memory Saver

Maintain clock and radio settings
when you disconnect your battery.

Accessory and some ECM functions are kept intact during times when your battery is disconnected. Memory keeper maintains power to prevent loss of pre-programmed settings in the vehicle computer, digital stereos, and keyless entry codes. Note: Not for use on 1997 and newer Corvettes.

86-96 Performance Brake Bias Spring

It seems simple and it is! But hundreds of hours of track testing went into the development of this performance part. When installed in place of the stock spring in a master cylinder, your Corvette will have better braking balance. Tests have shown a 20 foot shorter stopping distance when braking from 60-0 mph. This means that you can go deeper into corners on the track and stop faster on the street. Installation instructions included. Order today for better lap times and safer driving.

POWERSTOP EXTREME PERFORMANCE BRAKE SYSTEMS

Slotted And Cross Drilled Rotor with Brake Pad Set

PowerStop brake kits include a complete set of cross-drilled and slotted rotors and high performance Evolution ceramic pads. They make it simple by matching the pads and rotors for a big brake feel without the big price. The PowerStop brake kit offers more pad bite than other leading brands without noise and dust. If you need a fast, easy and affordable solution for better braking, then you need the Power Stop brake kit. Don't just stop...PowerStop!

Z23 Evolution Sport

Drivers looking for a performance upgrade for their daily driver. Drilled and Slotted Rotors with Ceramic Brake pads.

Z26 Street Warrior

High-Horsepower Corvettes with increased power and output modifications. Drilled and Slotted Rotors with High Carbon-Fiber Ceramic Brake pads.

Brake Pad Bed Instructions

1. After installing new brake pads, make 6 to 10 stops from approximately 30-35 mph applying moderate pressure.
2. Make an additional 2-3 hard stops from approximately 40-45 mph.
3. DO NOT DRAG BRAKES!
4. Allow 15 minutes for brake system to cool down.
5. After step 4 your new pads are ready for use.

1996's all used the 13" HD Front Rotors

HELPER

Anti-lock brake Corvettes (1986 and newer) cannot use silicone fluid. The higher viscosity silicone fluid will damage the brake controller.

How to Choose the Right Brake Pads for Your Corvette

Written by Danny Kellermeyer/DJ Racing

Good brake pads are a necessity for all vehicles. Trying to determine what you need for your driving application can be difficult, and the more money you spend doesn't mean it is the best selection for your Corvette.

What Are Brake Pads, and How Do They Affect Corvette Performance?

Brake pads are what stop your car. The pads are in the caliper and are touching the spinning metal rotor, so when the brake pedal is pressed, the caliper closes to clamp the rotor and slow or stop the car. This causes friction (and heat) at every stop. The rotors are designed with vanes inside the rotor sides to vent and dissipate the heat produced.

The pad material (pad compound) changes to give different characteristics for your driving needs. Organic, ceramic, or semi-metallic compounds are used. So, what do you need? The first question is, what are you expecting from your brakes? Are they being used for street driving, performance driving, auto crossing, or full road racing?

First, determine how your Corvette is going to be used. Are you street driving only, or are you doing a combination of street and auto crossing? How you will be using your car and the proper pad choice will give you the best stopping power and the best life of the pad.

The Best Corvette Brake Pads for Street Driving

Let's first talk about street driving. Street pads (or street compounds) give you good stopping power with low noise and little dust on the wheels. Organic and ceramic pads have been very popular for production and service. These compounds do not damage rotors and provide smooth and even friction during braking. Ceramic pads are also clean and produce less dust as they wear. Organics pads offer the advantage of lower cost. Ceramic street pads can operate in a heat range from 100-600°.

The Best Corvette Brake Pads for Autocrossing

Using your Corvette for auto crossing or Track day events requires more than organic, and ceramic compounds can offer. The stopping power of the organic and ceramic pads starts to fade as continuous heat generation is created. Autocross/trackpads have a great initial response, great modulation characteristics as well as greater stopping power. They will produce light noise levels, medium dust levels, and can operate in a higher temperature range (200-900°). These pads will usually cost a little more but are also more conducive to repeated stopping power.

The Best Corvette Brake Pads for Road Racing

Road racing events place the brake pads under extreme conditions. These pads are not designed to be quiet. They are designed for continuous stopping power and are required to take the heat over and over again with little brake fade. Road racing pads have an excellent initial response, excellent modulation, excellent stopping power but will exhibit high noise levels as well as high dust levels. They can operate and maintain high torque capability under extreme heat (400-1400°).

How to Measure Corvette Brake Pad Performance

The friction against the brake rotor surface (i.e., coefficient of friction) is measured in terms of Mu. If no friction is present, it is measured as a Zero. While full friction, which stops movement, is equal to 1.

The Mu factor will change with brake pad temperature. The pad compound will determine how quickly it will ramp in to stop your Corvette as well as how fast it will drop off (or fade) at higher temperatures. The Chart from Hawk Performance (Figure 6) describes the relationship of Mu change to temperature conditions. Street pads (Performance Ceramic) will usually operate in the 300 ° range. Auto crossing (HP+) will operate approximately in the 500° area. Full racing (DTC70) will operate in the 800° range and can spike up to 1300°.

The Bottom Line: It's All About Brake Pad Compounds

Do a little research to find out what compound you are buying. This will give you what you need for your Corvette, whether it is low dust, quiet operation, or full out repeatable stopping. When asking your Corvette to drive in different applications, it will be a give and take when it comes to dust or brake fades.

POWERSTOP
EXTREME PERFORMANCE BRAKE SYSTEMS

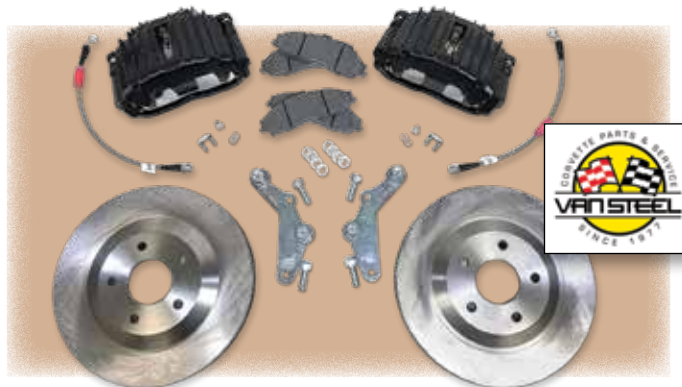

Cross Drilled and Slotted Brake Rotors

• Set of 2

PowerStop drilled and slotted rotors give you the advantages of both drilled holes for cooling and slots to sweep away gas and dust. PowerStop rotors use only the finest blanks and feature G3000 grade castings from the best foundries. All drilled and slotted rotors (except for hub rotor assemblies) are silver zinc plated to resist rust. The drilled and slotted design is our most popular performance rotor for street and day track applications.

C4 Front Upgrade w/C5 Brakes

Bolt on Brake performance upgrade packages for the C4 generation Corvette. Includes: C5 twin-piston front brake calipers, Hawk HPS high performance brake pads, VBP 13" front sport brake rotors which are 11% lighter than the OEM 13" rotor, D.O.T. approved stainless steel braided brake hoses, mounting brackets, hardware and installation instructions.

This kit works best with any 85-96 Corvette that is fitted with the following wheels: 94-96 Corvette "A-Mold", 17" x 9.5" wheels. (These wheels were original equipment on 94-95 ZR-1's 1996 Grand Sport and Special Edition Corvettes.) For Corvettes that are equipped with other wheels, you must check measurements to ensure proper clearance before installation.

Power Stop Track Day Brake Rotors with Pads Kit

Drivers who participate in "Track-Days" or "High Performance Driving Events (HPDE)" rely on their brakes and know the value of having brakes that are up to the task of Track use. High-Carbon metallurgy provides the highest coefficient of friction when used with the Power Stop "Track Day" brake pads. High carbon rotors have been used for years in competitive racing due to their resistance to thermal distortion and cracking. Precision drilling holes are strategically placed to avoid high stress areas and provide extra cooling by drawing air through the rotor. The rounded slots work to keep dust and debris off of the braking surface for better pad to rotor contact. All these features combined create the best brake rotors for your favorite Track Day event.

194072 88-96 Exc. HD (12" Rotors) 411.95
194116 88-96 w/HD (12 & 13" Rotors) 463.45

EradiSpeed Plus Rotors

EradiSpeed+ Plus rotors are still a direct OEM replacement, but the "plus" indicated rotors that are of a two-piece design. An EradiSpeed+ hat is CNC machined from billet or forged aluminum and anodized black. The hats and rotors are joined by the same hardware used in Indy cars. With a two-piece design, EradiSpeed+ units provide a welcome reduction in total rotor weight.

194063 88-96 Front Standard (12"), Pair 695.00
194017 88-96 Front Heavy Duty (13"), Pair 745.95
194110 88-96 Front Extreme+ (14"), Pair 2,812.50
194084 88-96 Rear All (12"), Pair 745.95

EradiSpeed-Plus-Two indicates 2-piece rotors which are larger than stock and include all necessary brackets and hardware to move the stock rotors outward to accommodate the OEM calipers. The result is increased performance by increased leverage of the larger rotor. EradiSpeed+2 rotors work with OEM C4 wheels. Eradi-Speed+2 for the C4 only apply to the REAR and increase the rotor diameter from 12" to 13".

194314 88-96 Rear (13"), Pair (ND) 745.95

Drilled or Slotted?

Slotted rotors do not improve any heat transfer. However, the slots can improve brake output by removing gas and dust that is trapped between the pad and rotor. This gas and dust reduces the friction force by preventing the pad from fully contacting the rotor. Given the choice between drill holes and slots, the drill holes will give you better braking power over slots for normal city/highway driving. This is why factory Corvette rotors are drilled, not slotted. However, for track racing (high speed stops), slotted rotors are the better choice.

Power Bleeder™

If you do any brake work on your Corvette, power bleeding is faster and more efficient than vacuum bleeding. This Power Brake Bleeder forces clean brake fluid through the system, quickly driving out all the air.

Fiberglass vs. Urethane: Which one to choose?

Fiberglass bumpers are a solid material and therefore need to be fitted to the body. Sanding and filling the bumper, and in some cases the body, will result in perfectly matched body lines between the bumper and the body. Fiberglass bumpers do not have the ability to absorb even minor impacts without breaking the surface. However, Corvette Central now offers **TruFlex** and **EZee-fit bumpers**, which are constructed of fiberglass and a revolutionary new resin which makes them 70% more flexible than standard fiberglass bumpers. After fitting, **TruFlex** and **EZee-fit bumpers** can be painted without adding a flex agent to the paint. This means that exact paint matches are easier to achieve. It is normal for these parts to have chips, scratches, and even minor cracks when received. This is considered to be normal and not a reason for part replacement.

Urethane bumpers were originally installed on Corvettes at the factory. They will absorb low speed impacts without bumper damage but they have a marginal fit and are subject to warping over time. Bumper to body fit is adequate but cannot be precisely fit like TruFlex bumpers. Color matches on urethane bumpers may be more difficult because a flex agent must be added to the paint, resulting in color shifts.

When installing Genuine TruFlex bumpers, and you don't have your old bumper cover retainers, there is an alternative solution. Genuine TruFlex bumpers have mounting flanges that are of substantial size and thickness to allow the use of bolts, nuts and flat washers (stainless steel is best) through the factory mounting holes in place of the original retainer strips.

Plastex Plastic Repair Kit

Anyone who owns a Corvette knows that parts break. But while metal and fiberglass are generally easy to mend, repairing plastic can cause a lot of pain. Plastic is often sun-baked to a brittle consistency, which makes it unworkable. Most of the time plastic parts are replaced, but that doesn't have to be the case anymore. Plastex has created a new plastic-repair kit that not only allows you to fix cracked and damaged parts, but also re-create parts with missing pieces. The Plastex kit is available in three different colors of plastic powder material (white, black, and clear), the trigger material, applicators, quick release pads, and even fiberglass fabric for repairs requiring structural support. For cracked areas, repairs can be made in a matter of minutes, with plastic hardening taking two to three minutes. Best of all, the new Plastex material is tougher than the surrounding plastic.

102713	Black (High strength and heat resistant)
103854	White (Best adhesion for general repair)
104948	Clear (Transparent for general repair)

(For Factory/Single Row Radiators)

NOTE: The AC Evaporator Can must be relocated. This kit is for use with single row factory radiators or high performance aluminum radiators.

84-95 Low Temp Fan Switch

- Lowers Engine Coolant Temperature
- Maximizes Engine Performance

The stock C4 Corvette cooling system runs inherently hot. CC has the solution to this annoying problem. CC offers electric cooling fan switches in four different temperature ranges. The switches will turn on the main fan, auxiliary fan or both at a lower temperature. Lower coolant temperatures will maximize engine performance and reduce engine wear.

244455	200° On/185° Off	36.95

HELPER
WHO'S IN CONTROL?

'84 and later Corvettes have a variety of cooling fans and fan control configurations. Here's how they shake out.

84 Corvette - The main cooling fan is controlled by a brass cooling fan switch identical to above switches. It's located on the passenger side cylinder head between spark plugs six and eight. Remove the factory connector by squeezing and pulling at the same time. Remove the factory switch and replace it with above switches. Fan on @ 238°, Fan off @ 201°.

85 Corvette - The main cooling fan is controlled by the ECM. If equipped with an optional auxiliary cooling fan (B4P), the fan is controlled by a brass cooling fan switch identical to above switches. It's located on the passenger side cylinder head between spark plugs six and eight. Above switches is required if the car has the B4P option. Fan on @ 226°, Fan off @ 35 MPH.

86-89 Corvette - The main cooling fan is controlled by the ECM. If equipped with an optional auxiliary cooling fan (B4P), the fan is controlled by a brass cooling fan switch identical to above switches. It's located on the driver side cylinder head between spark plugs one and three. Above switches is required if the car has the B4P option.

90-95 Corvette - The primary and secondary cooling fans are controlled by the ECM/PCM. The switch is installed in the driver side cylinder head between spark plugs one and three. A small 3/8" water jacket plug must be removed with a piece of 5/16" square tube. The switch replaces the plug. Above switches fan switch harness and switch is required.

90-93 Corvette - Primary fan on @ 226°. Secondary fan on above 235° and primary fan on for more than 2 seconds. Both fans off at 45 MPH and coolant temp below 226°.

94 Corvette - Primary fan on @ 219°. Secondary fan on above 228° and primary fan on for more than 2 seconds. Both fans off @ 45 MPH A/C pressure below 248 PSI and coolant temp below 226°.

95-96 Corvette - Both fans on at 226° half of full rotational speed (low speed)

GM Radiator Cooling System Stop Leak Tabs

• DEX-COOL Compatible • Seals Minor Leaks • Non-Toxic

GM Cooling System Seal Tabs are recommended for all water cooled engines and aluminum blocks. The original vegetable formula is designed for use in radiator systems to seal and prevent leaks due to casting porosity in engine components.

Low Temp Thermostat

These Hi-Flow thermostats allow your engine to cool down to lower temperatures than the factory thermostats. Lower operating temperatures improve performance in two ways. First, the mass flow rate of intake air is increased and second, the engine's tendency to "ping" is reduced. This allows the engine to produce more horsepower.

SERVICE PARTS I.D. LABEL

The Service Parts Identification Label provides identification of vehicle equipment to assist in servicing and determining replacement parts. Included on this label will be regular production options (RPO's) as well as standard and mandatory options.

The label was located as follows:

- 84-85 models - Left side rear storage compartment
- 86-95 models - Inside of console door

Water Wetter

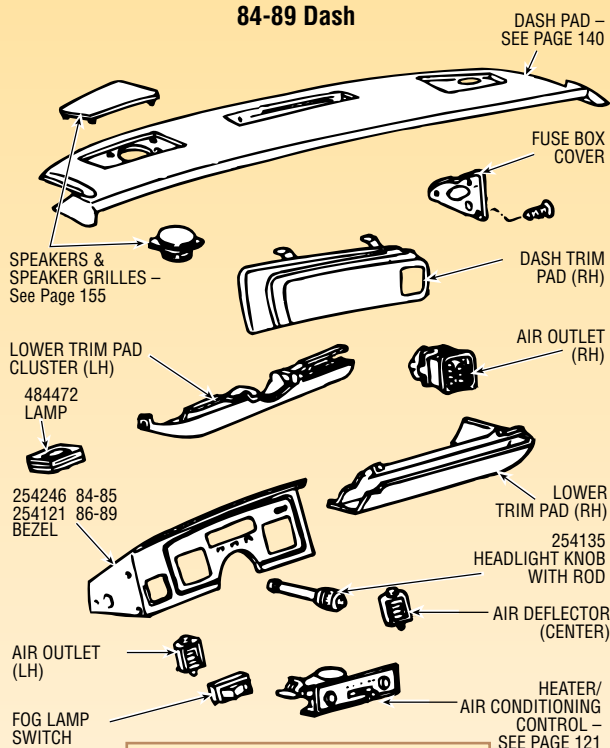

A unique wetting agent which reduces cooling system temperatures up to 30° F. Helps provide rust and corrosion protection and improves heat transfer properties of plain water, ethylene, and propylene glycol cooling systems. Use with aluminum, cast iron, brass, and bronze components.

Custom Dash Kits

Dash kits are available in 4 material choices — including 2 wood - Burlwood and Rosewood. Each wood dash kit is crafted from a single piece of material so grain pattern and color is consistent from one piece to another. Wood is laminated to a temperature stable core material to eliminate warping, and then finished with a high gloss, scratch resistant epoxy coating. All dashes are computer machined for a perfect fit and install over your existing dash with hardware and adhesive included with each kit.

91-96 Dash Kits

Unlike other dash kits, all of our 91-96 kits include a headlight switch panel and a custom instrument cluster panel that installs behind the factory cluster lens. This gives you a real feel of a factory installed complete wood dash.

92-96 Pertronix Flame Thrower Ignition Coil

- Fits 92-96 LT1 and LT4; 90-95 ZR1
- 50,000 Volts
- Ultra low primary resistance values
- Limited 90 day warranty
- Legal in all 50 states and Canada (C.A.R.B E.O. #D-57-21)

Flame Thrower E-Core Coils feature optimized winding design to maximize spark gap current and available voltage. When teamed with Flame-Thrower Ignition Modules they produce 100% more energy across the spark plug gap (during a one millisecond burn time) compared to the OEM coil.

UPGRADE

HEI Control Modules

84-90

92-96

Now legal in 50 states, these modules are designed to fit stock and modified distributors. They feature solid state electronics and provide high coil output and superior reliability. Dwell control circuit ensures long, consistent coil charging and current control circuit protects against coil overheating. Also resists false triggering from RFI of high output coils.

92-96 MSD Pro-Billet Distributor

- Advanced optical encoder trigger design for accuracy and reliability.
- Easily adjust the timing up to +/- 5 degrees.
- Improved housing design and extra bolt eliminates leaks.
- Fresh air vented and sealed to keep the elements out.
- Large ball bearing stabilizes timing through 10,000 rpm.
- Rotor drive design is positively indexed and cannot slip.

Machined of aluminum down into a precise housing that fits in place of the factory piece. Fill with a reliable new pickup assembly, a trick timing adjustment mechanism and top it off with an all new MSD distributor cap!

POWER BOOSTER from

274557 85-91

85-91 Hypertech Power Coil Kit

The Power Coil Kit produces 40% more voltage than a stock coil, resulting in 53,000 volts of energy to prevent spark plug fouling and produce improved performance. Distributor cap is made of a high dielectric material to prevent carbon tracking and is equipped with bronze terminals for maximum conductivity. The Power Rotor is burn-through resistant and has bronze terminals and nylon screws that prevent grounding.

84-96 Custom Lower Door Seals

- Keeps Dirt Out and Door Sills Clean
- Easy Installation

Door seals attach to the bottom of the doors and seal against the body when the doors are closed, preventing dirt and debris from entering the door seal area. This helps keep clothes clean when you enter or exit your Corvette. Easy installation uses double-sided tape that is included, but it is a good idea to use some additional glue to help hold them.

87-91 Cast Ribbed Valve Cover

Center bolt small block Chevrolet valve cover. Fits 1987-1996 center bolt heads. Raised Corvette script letters and fins. Two-bolt mounting. Cast-in baffling located on intake manifold side. Slightly taller than stock to allow roller tip rockers.

304819	Cast Finish, pr. (ND)	748.05
--------	-----------------------------	--------

NOTE: These are sand cast parts and there will be some porosity.

86-91 Chevrolet Valve Covers

• Polished Aluminum

These die cast aluminum valve covers are polished to give them a bright shine. They are used on all 1986 and newer engines with center hold down design. They are approximately 1/4 inch taller than production covers. Use valve covergasket part #304500. Includes two valve covers, eight bolts, washers, and seals.

304835	Pair (ND)	381.05

Road Race Oil Pan

Features:

- 5 Trap door baffles
 - Works with stock starter
 - Oil temp fitting • Magnetic drain plug
 - 20mm fitting for low oil warning sender
 - Removable one-way screen windage tray with built in crank scraper
- Designed for 84-96 Corvettes, is 7" deep so it fits well in a variety of chassis where low ground clearance is an issue. 13 3/4" wide, 12" long sump holds 6 quarts which gives a 7 quart system capacity.

Remote Oil Cooler

Kit contains an 8" x 11" x 1.5" 20,500 BTU oil cooler with mounting hardware, a billet aluminum sandwich adapter that mounts between the engine and the spin-on filter, 10 feet of stainless steel braided hose and all the necessary fittings. Oil coolers feature brazed aluminum construction and a high flow clog resistant design.

304727	(ND)	569.00
--------	------	-------	--------

- Increased levels of "zinc" (zinc dialkyldithiophosphate) provide outstanding anti-wear protection for engines with either "flat tappet" or roller type cams.
- Penn Grade base oils provide excellent film strength while synthetic stocks enhance performance over a wide range of operation temperatures and conditions.
- Oxidation and foam inhibitors offer protection against thermal degradation and air entrainment.

A truly versatile oil suitable for engines used both on the street and/or the track. The multi-viscosity grade and synthetic components facilitate cold starting and quicker engine warm-up while insuring adequate engine protection during competition.

301236	Quart 10W-30	11.95

POWER BOOSTER

AC Delco Spark Plugs

Original equipment spark plugs are designed to totally complement every other component in your factory ignition system. The resistance in AC spark plugs is perfectly matched to your ignition system so that radio interference is minimal. You'll realize optimum performance when AC Delco plugs are used in an AC Delco ignition system.

664008	86-91	EGR Valve Temperature Switch Plug with Wires	10.15

Electrical components such as coils, spark plugs, wires, ECM's, switches and sensors are

NON-RETURNABLE PARTS

Always refer to a factory service manual when diagnosing engine service problems. You can damage electrical components if the proper procedures are not followed. Be sure you are replacing the correct part.

AIR System - See Page 73

we accept

• ordering information in front of catalog

Mass Air Flow Sensor (MAF): The MAF sensor measures the amount of air entering the engine, while compensating for various temperature and altitude conditions. The ECM receives a voltage signal from the MAF sensor which aids in determining the correct fuel mixture. This is accomplished by a heated element inside the sensor housing.

304875	85	Mass Air Flow Sensor (MAF)	173.00
304529	86-89	Mass Air Flow Sensor (MAF)	187.60
304482	85-89	Mass Air Flow Sensor Seal	4.60
305030	94-96	LT1 Mass Air Flow Sensor (MAF)	
		(Exc. 94 w/Int. Air Temp. Sensor)	143.45

When replacing the mass air flow sensor, it is also recommended to replace the power/burn off relay on 86-89 cars (on firewall-behind battery).

HELPER EMISSIONS SYSTEM TERMINOLOGY

EGR - Exhaust Gas Recirculation: Exhaust gases containing unburned fuel are recirculated back into the engine to be re-burned.

TVS - Thermal Vacuum Switch: A temperature sensitive switch that controls vacuum supply to other engine components by opening and closing at specific temperatures.

A.I.R. - Air Injector Reactor (Smog Pump): A belt driven pump that injects cool outside air to the exhaust valves to promote combustion of unburned fuel.

M.A.T./I.A.T. - Manifold/Intake Air Temperature Sensor: Measures air coolant temperature and signals computer to adjust fuel mixture.

Manifold Air (MAT) Intake Air (IAT) Temperature Sensor

Measures air temperature in the intake manifold. The sensor's resistance changes as the temperature increases or decreases. The computer receives this change in signal and adjusts fuel mixture accordingly.

Failure Symptoms: "Check Engine" light is on continuously, hesitation, poor mileage or rich exhaust odor, poor performance and economy.

Throttle Position Sensor-Stock (TPS):

Connected to the throttle shaft, this sensor is controlled by the accelerator pedal movement. A five volt reference signal is sent to the TPS by the ECM. As the throttle rotates output, voltage back to the ECM changes. By monitoring TPS voltage variations, the computer can schedule fuel based on throttle angle location and rate of movement.

When sending in exchange, the ECM must not have any visible evidence of damage or fluid intrusion. We will also need your VIN# and odometer reading when sending in your unit.

★ Keep the chip out of your original ECM ★

Electronic Control Module (ECM): As the control center of the fuel injection system, the electronic control module constantly monitors information from various sensors, including the opening times (pulse width) of the injectors. It can diagnose operational problems, alert the driver through the "check engine" light, and store a code or codes which identify the problem areas to assist in making repairs. This unit also houses the PROM (Programmable Read Only Memory) or MEM-CAL (computer chip) which contains specific calibrations for a given engine.

ECM must be returned to Corvette Central in box that the exchange unit comes in for refund.

84-91 GM Computer Code Reader

- Compatible with OBD I 1982-1993 Corvettes
- Retrieves Engine Trouble Codes from the On-Board Diagnostics (OBD) Computer
- Retrieves ABS Trouble Codes from the On-Board Diagnostics (OBD) Computer
- Trouble Codes Flash on Dashboard "CheckEngine" Light

Allows you to define service problems by reading trouble codes. Simply plug reader into your ALDL (Assembly Line Diagnostic Link) under the dash, turn ignition to 'on' and read the number of blinks from the 'Service Engine Soon' light on the instrument panel. Computer safe. No batteries required. Instructions included.

85-91 MAT Sensor Relocating Kit

Help your MAT sensor keep its cool and gain horsepower!

The MAT sensor's stock location subjects it to a great deal of heat and can cause a loss of power due to incorrect readings. In just 30 minutes, the MAT Sensor Relocating Kit allows you to move the sensor to where it will read cool ambient air temperatures. This is a plug-in kit, no wire cutting. Comes with plug-in harness, plugs, grommet, and wire ties.

304006 85-91 Mushroom Connector.....62.90

NOTE: The Mat Sensor is located under the air plenum on drivers side.

POWER BOOSTER

from

92-96 LT1 or ZR1 MAT Sensor Relocator Kit

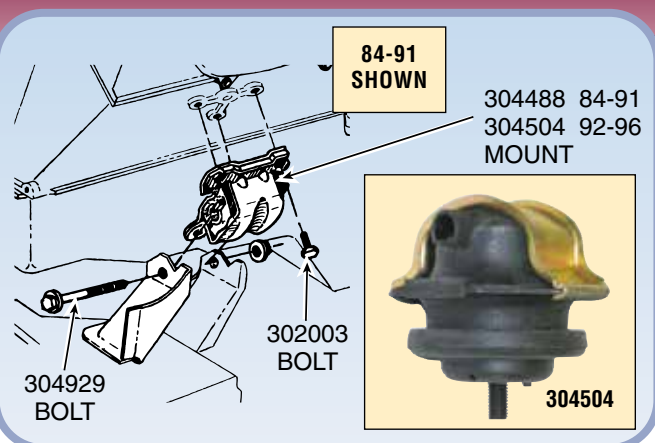

• Dramatically Improves Performance

The Air Temperature Relocating Kit repositions your engine's air intake temperature sensor from the hot plenum area to the air filter base where it can sense cooler air temperatures resulting in increased engine performance. Installation hardware and 30 minute step-by-step instructions included. Includes sensor.

304710..... 58.60

NOTE: 92-96 IAT switch stock location is in the air intake duct.

85-91 Air Pump Eliminator Pulley Kit

85-91 A.I.R. pump eliminator pulley kit is designed to increase HP by reducing engine drag and eliminating nearly 20 lbs. of bulky air pump. This aircraft grade aluminum bracket with plastic pulley kit features improved aesthetics and performance, better valve cover clearance, and a clear view of the engine timing mark. Tests indicate gains of approximately 20 HP and minimal changes in emissions readings. And, best of all, you can retain your original serpentine belt. **For 1984 you will have to relocate the power steering reservoir. You can manufacture a bracket, strap it to the eliminator pulley bracket, or use the 85 style reservoir bracket. The 85 bracket is discontinued from GM, so you will have to find it used.**

Power Pak Kit

- Throttle Body Air Foil
- Hi-Temp Triple Siliconed Spark Plug Wires
- Adjustable Fuel Pressure Regulator
- High Flow, Reusable K&N Air Filter

Most bolt on performance products work better when used in combination with each other. Here's a combination of components that really work well together. Our Power Packs were designed to work together to help develop the power you want with the fuel economy you need. Most installers report 15-20 horsepower gains. Minimal installation time. A perfect partner to our Performance Computer Chips & Programmers

With Spark Plug Wires			Less Spark Plug Wires	
85-89	304109	232.70	304796	171.05

Use a computer Power Chip with the Fast Pak Kit for MORE POWER!

6 Best C4 Performance Modifications*

- Lower Rear Axle Ratio
- Cold Air Induction System or Air Filter
- Performance Mufflers/Cat Back Exhaust System
- Modified Throttle Body or Air Foil
- Adjustable Fuel Pressure Regulator
- Upgrade Ignition System

*Listed in the order of recommended installation assuming you are starting with a stock L-98, LT1, or LT4 engine.

- Improved power and throttle response.
- Quick and easy installation.

Street Runner Power Chips are designed for daily street driving on stock or slightly modified engines (high-flow air cleaner, cat back exhaust) with a stock thermostat. Thermo Master Power Chips include all the features of the Street Runner and it is programmed to allow the use of a 160° Powerstat. Cooler running engines can produce more horsepower. Both of these Power Chips are programmed to recalibrate fuel delivery and ignition timing to deliver maximum torque and horsepower for significantly improved acceleration and top-end speed without sacrificing reliability. An added benefit of any Power Chip is

the re-programming of torque converter lock-up. Power Chip delays the lock-up until high gear which significantly improves driveability. Installation is easy and requires less than 30 minutes time. Just locate your car's computer (ECM), remove the cover, and plug in the new Power Chip.

No Discount (ND) on Hypertech Power Chips.

- = Designed for use with #244427 Powerstat.

Low Temp Thermostat

This 160° Hi-Flow thermostat allows your engine to cool down to lower temperatures than the factory thermostat. Lower operating temperatures improve performance in two ways. First, the mass flow rate of intake air is increased and second, the engine's tendency to "ping" is reduced. This allows the engine to produce more horsepower.

Oil Filler Funnel with Adapter

This oil filler funnel kit helps to avoid a messy clean up after changing your oil. Includes a plastic funnel and an aluminum adapter that screws into your valve cover in place of the oil filler cap.

304028 93-96 44.95

85-96 High Flow Throttle Body Air Foil

- Adds 11 horsepower.
- Increases torque 12 ft./lbs.
- Boosts air flow by 40 CFM.

High flow throttle body air foil reshapes the air as it enters the intake plenum to produce more torque and horsepower. It adds higher usable RPM and yields 11 HP at 4750 RPM. The foil installs into the opening of the throttle body in less than 5 minutes with just one screw and fastener. No other modifications are required. Emission legal in all 50 states (EO #235-1).

304520 (Except 90-95 ZR-1) 31.40

84-91 Throttle Performance Switch

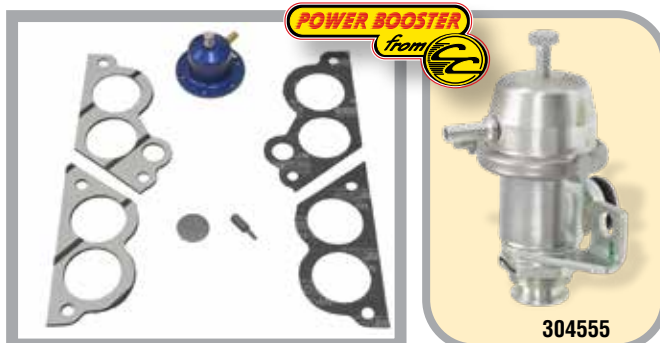

Not to be used with any
other power chips

The Throttle Performance Switch is designed to engage at 60% throttle in every gear. Once it's activated at 70% it delivers a full 4.6 volts to the computer. The computer reads this as a valid wide-open throttle signal and delivers maximum fuel and timing at that point. The result is an immediate improvement in acceleration that you can feel through the throttle. Installing this unit will override a worn TPS sensor or a stretched throttle cable. Each unit has two LED lights on it. It is a simple five-minute installation. It has the factory connectors on each end, so it simply plugs into your factory TPS sensor in a series. Nothing could be easier for power.

Not to be used with any other power chips.

354277 84-91 132.45

CC Suggests: Change your computer chip for the perfect combo!

85-96 High Pressure Fuel Regulator

High pressure adjustable regulator raises fuel pressure from stock 36 p.s.i. to 47 p.s.i. resulting in a 10 HP gain. Easy to install and requires no other modifications. Instructions and gaskets are included. Emission legal in all 50 states (EO #235-2).

304570 85-91 Regulator is cover only, uses your original base.. 123.60
304555 92-96 Complete Regulator (ND) 182.90

Performance Spark Plug Wire Set

- Increase horsepower and torque
- Withstands temperatures up to 600-degrees Fahrenheit
- Prevents spark jumping and reduces interference
- Improves overall performance

94-96 Granatelli Mass Air Flow Sensor

- Add 10-15 Horsepower in 10-15 Minutes
- From Granatelli Motorsports is this innovative Mass Airflow Sensor for LT1 or LT4. This 50 state legal replacement unit features 47% more airflow capacity than the stock sensor, and state of the art hybrid electronics. The advanced, active electronics module packaged within the sensor provides improved control of both ignition and injector timing, contributing to a performance gain of 10-15 horsepower at the rear wheels. 3 Year Warranty. Power Aid Throttle Body Spacer – See Page 111

94-96 Ported MAF Housing

This specially designed mass air flow housing produces over 1000 CFM in comparison to the stock unit which flows about 644 CFM. Machined out of Nylon, it holds less heat which in turn provides cooler air intake temperatures. Dyno results show up to a 9 HP and 7ft/lb. of torque gains.

Bosch Platinum Spark Plugs

The ultimate spark plug features a 99.9% platinum center electrode which results in reaching self-cleaning temperature seconds after start and a lower ignition voltage requirement, leaving a greater ignition energy reserve.

Additional benefits include no misfiring, smooth running under lean fuel operating conditions, an unchanged electrode gap throughout life of plug, wider heat range, lower fuel consumption and lower exhaust emissions for life of plug.

303118	84-86	w/Cast Iron Heads (Set of 8)	70.25
--------	-------	------------------------------	-------

Corvette Central recommends NGK spark plugs for street and performance applications. These plugs typically result in quicker throttle response and an overall smoother running engine.

Ignitability of V-Power Spark Plugs

“NGK’s unique V-Power design directs the spark to the edge of the electrode where it can develop more rapidly. This allows easier and more complete combustion of the air/fuel mixture. The increased ignitability allows the engine to burn air/fuel rations that would otherwise be too lean.”

Iridium IX - The ultimate evolution of a performance spark plug.

It may be time to invest in precious metal futures. NGK Iridium Spark PLugs represent the ultimate evolution of spark plug technology and performance. Iridium allows for a center electrode 75% the size of a platinum electrode and 24% the size of a conventional nickel electrode.

- **304927** 87-96 Hydraulic Roller Camshaft (219/219 .560/.560)(ND)445.75
- = Requires 1.6 ratio rocker arms.

Camshafts will require PCM programming will produce a good idle at 750 RPM. All of the Lingenfelter hydraulic roller cams are produced from a hardened steel core with a unique distributor gear. This eliminates the need for a special bronze distributor gear, which must be replaced frequently due to the soft material. Hydraulic roller cams may be used with the stock hydraulic roller lifters.

85-96 Hi-Performance Pulley Set

Get up to 20 HP on 84-91 and 10 HP on 92-96 without modifying your engine with this pulley system.

An undersized crankshaft pulley turns belt-driven accessories 25% slower preventing parasitic horsepower losses and an oversized alternator pulley (22%) and water pump pulley (23%) keep these accessories turning near their proper speed to provide the correct electrical charge and prevent overheating. Sets DO NOT include Belt, this will need to be purchased separate. Not legal to use in California or non pollution controlled vehicles.

LT-1 Coolant ByPass Kit

Bypass the coolant running through the throttle body by installing this simple bypass kit. With no hot coolant running through the throttle body, the air entering the engine is cooler, and cooler air has more oxygen which produces more horsepower. Simple installation.

304782..... 21.30

85-91 Air Pump Eliminator Pulley Kit

85-91 A.I.R. pump eliminator pulley kit is designed to increase HP by reducing engine drag and eliminating nearly 20 lbs. of bulky air pump. This aircraft grade aluminum bracket with plastic pulley kit features improved aesthetics and performance, better valve cover clearance, and a clear view of the engine timing mark. Tests indicate gains of approximately 20 HP and minimal changes in emissions readings. And, best of all, you can retain your original serpentine belt. **For 1984 you will have to relocate the power steering reservoir. You can manufacture a bracket, strap it to the eliminator pulley bracket, or use the 85 style reservoir bracket. The 85 bracket is discontinued from GM, so you will have to find it used.**

304439 Black Finish-Plastic Pulley 183.85

Engine Degreaser

Corvette Fuel Injection & Electronic Engine Management

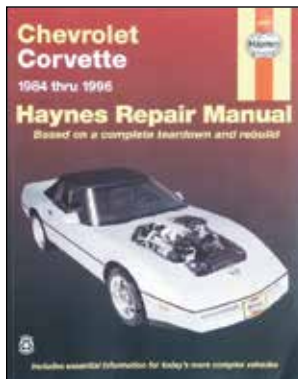

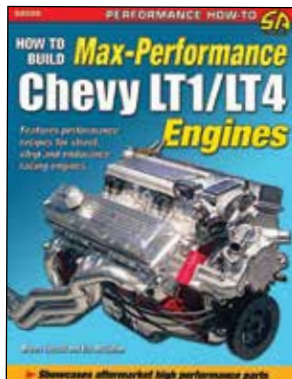

This book is a hands-on guide to understanding, servicing and modifying your Corvette electronic engine management system. The heart of the Corvette is its' electronic engine management system, and this book explains that system. It covers fuel injection systems from 1982 L83 to ZR1 through 2001 LS1. Included are 112 pages of model specific wiring diagrams, trouble codes and test specifications along with hundreds of GM photos and illustrations. If you have an interest in electronic fuel injection systems, author Charles Probst makes these systems easy to understand. 8 1/2" x 11" softbound, 380 black and white pages.

114083..... 75.70

How To Rebuild Max Performance LT1/LT4 Engines Book

This book investigates every component of the LT1/LT4 engines, discussing their strong and weak points and identifying characteristics. Upgrades and modifications for both improved power production and enhanced durability are described and explained in full. All relevant factory casting numbers are listed. Aftermarket component upgrades for improved street and track performance are defined clearly and in great detail. Softbound, 8.5" X 11". 136 Pages, 300 color photos.

114273.....37.85

84-96 Haynes Automotive Repair Manual

Familiarize yourself with your Corvette. Helps you decide what work must be done-either by yourself, your dealer, or independent shop. Manual offers diagnostic and repair procedures for routine maintenance and servicing. Includes easy-to-follow photos, trouble-shooting sections, and wiring diagrams.

"NO DRONE"

OE Style Correct Sound Dual Outlet Mufflers for 84-90 Corvettes.

Corvette Central's exclusive correct sounding dual outlet mufflers for the 1984-1990 Corvette. These are manufactured and welded in USA by Corvette Central (cases are manufactured in Canada).

On the original 1984-1990 dual-outlet muffler, the inner outlet tube is for appearance only, and is blocked off. With our design, the outer outlet tube is open, but the inner outlet tube is connected to a small diameter resonance tube. This design provides the correct sound and quietness of the original design without the annoying low-RPM drone.

POWER BOOSTER

Great Sound, Improved Performance and Good Looks!

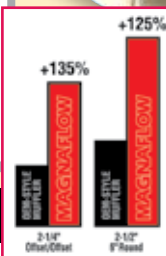

Magnaflow Mufflers

- LT1 Tip

Corvette Centrals' own performance mufflers are the answer for C4 owners looking for more power, smooth deep sound and good looks. The aluminized, all welded straight-through design delivers improved performance, reduced resonance, power and durability along with a smooth deep tone. The unique straight-through design produces unrestricted flow with greatly reduced back pressure and maximum sound control.

- Has Holes for Oxygen Sensors
- Has a crossover "H" pipe in the system. This will improve the performance.
- Except ZR-1

Replace the power-robbing, restrictive stock system on any 84-91 Corvette with our high performance dual exhaust aluminized steel system. Works great when matched with a high performance computer chip. Add a set of Corvette Central's own 84-91 high performance mufflers for the ultimate free flow exhaust. Bolts up to original hangers.

Off road or race use only – not for highway use.

92-96 Performance Exhaust

- Designed And Manufactured By

Have It Your Way! Choose The Exhaust Combination You Want.

Add a distinctive tone to your 92-96 Corvette with our Chambered or Straight Pipe Aluminized Exhaust System. Constructed of 2 3/4" pipe, the center sections of this dual system feature an H-Pipe design, which produce that powerful side exhaust sound of the 1960's. Specifically designed for LT-1s and LT-4s, the system also features LT-1 style tips for the ultimate high performance look. System installs just behind each catalytic converter.

PRODUCT

Sweet Thunder Chambered Exhaust System Muffler/Rear Section

- Streamlined mandrel bends with shallow angles reduces back pressure and a larger crossover passage to maximize exhaust system balancing
- The Sweet Thunder Exhaust System uses all the factory hangers
- The integrated chambered muffler specifically designed for the C5 allows for a cleaner tight fit without sacrificing flow or sound
- Bolt-On exhaust system for enthusiasts looking for performance and sound utilizes 2-1/2" 14 gauge aluminized tubing throughout
- Exhaust tips are made from 300 series polished stainless steel formed to fit the factory opening

Sweet Thunder Mandrel Bent Rear Section Exhaust System with the great classic muscle car sound. No doubt those not lucky enough to be driving your Corvette will end up seeing this view of the highly polished stainless tips and the second pair of chambers pumping out that Sweet-Thunder V8 tune!

92-96 Fusion Muffler Upgrade with Vacuum Kit

**NEW
PRODUCT**

- 4-1/2" Quad Rolled OVAL Tips
- Mandrel bent from the highest-grade T-304 stainless steel
- Designed, tested, and manufactured to the finest hand-made integrity found in any exhaust system

The Fusion is a bi-modal exhaust system, meaning it has two passages, or modes, that the exhaust can travel through the muffler. Each of the mufflers has two outlets, with one side having a butterfly type valve which allows the exhaust flow to be shut off, regulating which side of the muffler the flows exhaust. One side of the muffler is the "quiet" side, and one side is the "loud" side. The "quiet" side is a smaller, muffled and chambered tube, while the "loud" side is 3" tubing straight through.

Power Pulse Stainless Steel Cat Back Exhaust System

92-96

- Unrestricted straight-through muffler design increases exhaust flow by 42%
- Eliminates interior resonance
- 100% stainless steel construction

- Complete cat-back system includes installation instructions and hardware
- Direct bolt-on, no cutting or welding required
- 50-state legal, does not void manufacturer's warranty
- Made in the U.S.A.

**AVAILABLE
FOR 86-96**

86-91

CORSA's Power-Pulse™ Reflective Sound Cancellation RSC) exhaust technology uses reflective sound waves to cancel unwanted exhaust noise and interior resonance. This 2-1/2" unrestricted, straight-through muffler design has no baffles or sound-absorbing packing. The sound is bold and clean at full throttle and incredibly quiet at cruise and highway speeds.

Each exhaust system is hand-crafted of 100% stainless steel with CORSA's polished new styled "Pro-Series 3.5" 315L stainless steel exhaust tips welded in place. CORSA Power-Pulse™ exhaust systems feature excellent fit and are easy to install. You will be able to enjoy the unique CORSA sound and appearance for years to come, because every Power-Pulse™ exhaust system is guaranteed for as long as you own your C4!

Convertible Wind Restrictor

- General Motors Licensed Product
- Lifetime Warranty
- Custom options such as logos and lighting available
- Made in the USA

Wind Restrictor is an amazing, unique and durable product that blocks as much, if not more, wind turbulence than the factory OEM mesh net windscreens and helps to maintain the temperature inside of your roadster when the top is down. It can remain in place with the convertible top up and is mounted solid yet inconspicuously without any permanent alterations. Made from double-sided clear AR Polycarbonate, a very durable acrylic type material is also scratch resistant!

Bumper Has Recessed "CORVETTE"
Letters Above License Area

Fiberglass vs. Urethane: Which one to choose?

Fiberglass bumpers are a solid material and therefore need to be fitted to the body. Sanding and filling the bumper, and in some cases the body, will result in perfectly matched body lines between the bumper and the body. Fiberglass bumpers do not have the ability to absorb even minor impacts without breaking the surface. However, Corvette Central now offers **TruFlex and EZee-fit bumpers**, which are constructed of fiberglass and a revolutionary new resin which makes them 70% more flexible than standard fiberglass bumpers. After fitting, **TruFlex and EZee-fit bumpers** can be painted without adding a flex agent to the paint. This means that exact paint matches are easier to achieve. It is normal for these parts to have chips, scratches, and even minor cracks when received. This is considered to be normal and not a reason for part replacement.

Urethane bumpers were originally installed on Corvettes at the factory. They will absorb low speed impacts without bumper damage but they have a marginal fit and are subject to warping over time. Bumper to body fit is adequate but cannot be precisely fit like **TruFlex** bumpers. Color matches on urethane bumpers may be more difficult because a flex agent must be added to the paint, resulting in color shifts.

84-96 Body Repair CD

If you or your body shop are going to make fiberglass repairs to a 84-96 Corvette, then these two books on CD are required reading. Both books are written to guide the reader in techniques used for fiberglass repairs and panel replacement specifically for C4 Corvette. Written in a step-by-step format for both the do-it-yourselfer and the professional, these books include detailed photos and illustrations to clarify every step.

Front end repairs are covered in Volume 5 - 128 pages with more than 225 large black and white photos. Repairs to the rear of the car are covered in Volume 6 - 160 pages and over 229 large black and white photos and illustrations.

114046	Front Body Repair CD Volume 5	48.70
114021	Rear Body Repair CD Volume 6	48.70

Bonding Adhesive & Filler

Fiber Glue adheres and bonds to fiberglass, SMC, BMC, FIMN, FRP, Graphite and other types of composites. Adhesives come with hardener.

143202 Fiber Glue - Quart 66.10
Cannot be shipped by air.

Fiberglass Repair Kit

Bondo Fiberglass Repair Kits have everything needed for the Do-It-Yourselfer, including easy How-To directions.

141169 39.80

NOTE: There may be a crating charge on some fiberglass items. Some items require a special box to insure that you receive the items undamaged.

Grand Sport Rear Fender Flares

These reproduction fiberglass rear fender flares are identical to the OEM units installed on 1996 Grand Sport Corvette coupes. Not cheap knockoffs, they are the same weight and construction as the originals and come in a smooth, gelcoat finish ready to sand, prime, and paint.

Flares mount with professional grade double-stick tape (pre-affixed) or use the included fastening screws for a more permanent installation.

Update Your 84-90 to 91-96 Styling

91-96 Style Front Bumper Replica

Fits all 84-90's
Uses early 84-90 moldings. Uses round 91-96 corner/turn lights, but maintains use of 84-90 early style driving lights.

+144395808.40

Incorporates 91-96 molded in bumper moldings and requires 91-96 driving/turn lamps and side markers. To be used with 91-96 side fenders, door and quarter moldings, and 144394 rear bumper to complete update look.

+144397808.40

+ = Ships Truck Freight.

84-90 Body Update Kit

Lamps come pre-mounted!

91-96 Conversion Components:

Front and Rear Update Bumpers

- 91-96 Front Spoiler
- 91-96 Wide Door Moulding (L or R)
- 91-96 Rear Quarter Wide Moulding (L or R)
- 95-96 Side Fender w/Wide Moulding (L or R)

This kit no longer includes the front marker or back up lamps - Discontinued by GM

+144339 (ND)5,005.25

Installation Helper

NOTE: You will notice that we list these bumpers with the lamps installed. This is the best way to ensure the lamps fit properly. The holes and mounting flanges are cut and the lamps are professionally installed. Just remove the lamps, paint, and reinstall. These kits also include required lamp sockets. The holes for the side marker lamps are pre-cut and ready for you to transfer your original lamps.

ZR-1 Style Update Rear Bumper

Fits all 84-90's

Updates 84-90 Corvettes to 91-96 styling, but incorporates the stock black moldings to match existing 84-90 style moldings. Moldings are molded into bumper so no additional moldings are necessary. Moldings must be painted black. Uses square tail lamps like ZR-1. Uses stock 84-90 backup and rear marker lamps. No hole for 3rd brake light. Bolt on installation like factory bumper. Does not have Corvette word molded in.

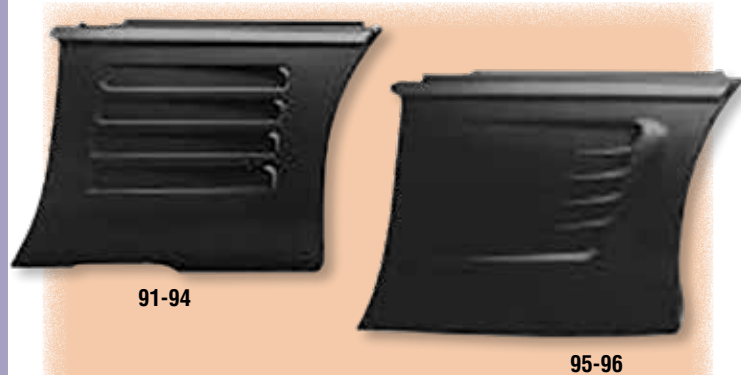

+144396896.45

91-96 Stock Rear Bumper

This bumper will fit on 84-90's when updating to round 91-96 Moldings.

+144394896.45

Belt Moldings — See Page 92
Lights & Lamps — See Pages 148-151

84-90 Update Side Fenders

Update your 84-90 or add the finishing touches to update bumpers. Accepts 84-90 black body moulding.

**Corvette
Central**

When installing custom fiberglass panels, be aware that all Corvettes do not come from the factory with exact identical body dimensions. Therefore when replacing or adding any custom fiberglass parts to your Corvette, it is recommended that you fit these parts to the body before you begin painting. This will help assure a quality appearance to your restyling job and avoid installation problems after painting.

The same procedure is also recommended when using factory replacement panels such as bumpers, hood etc.

Forever Black Moulding Reconditioning Kit

- Works On C4 Luggage Racks Also

Forever Black permanently restores original black finish on side moldings, wheel wells, splash guards, and all other plastic, vinyl and rubber surfaces. Eliminates wax stains and U.V. damage. Contains no silicone, no oily residue, and dries in minutes.

NOTE: There may be a crating charge on fiberglass items. Some items require a special box to insure that you receive the items undamaged.

Vader Hood Scoop 2 1/2" Hi Rise

Bolt this scoop directly to your stock Corvette hood for great looks and styling.

144441 588.75

Hood Louvers

Add style to your Corvette with these louvers. These are bond-in items, hood must be cut to install. They are NON-functional, but can be cut to function.

144347 Pair.....308.20

HELPER FIBERGLASS TERMS

HL = Hand Layup parts are manufactured by hand laminating pattern cut fiberglass mat and fiberglass resin into a precision mold. This method produces high strength panels with uniform thickness and smooth surface only on 1 side.

PM = Press molded parts are formed under pressure in matched molds as original. This assures a high strength part with a smooth surface on both sides.

+= Truck Ship Items are shipped freight direct from our supplier, and orders must be prepaid.

***=** Dropship Only

NACA Ducts

Your hood will be complete with these NACA ducts, which adds both styling and increased air intake. They are NON-functional, but can be cut to function.

- 144342 Small (5" Long), pr 186.00

Stalker Series Wide Body Kit from ACI

Stalker Kit comes complete with:

- Front Bumper
- Rear Bumper
- Rear Wing
- Fender Flares
- Rocker Treatments
- Door Treatments
- Vader Mirror Caps
- All Mounting Hardware

Kit includes an aerodynamic front bumper cover, sleek rocker and door treatments, Stalker rear wing, the famous Stalker rear bumper cover, along with fender flares and Vader mirror caps to complete the look. The Stalker is a state-of-the-art kit and the best fitting wide body styling available on the market. Kit comes complete with mounting hardware and instructions.

92-96 Adjustable Mass Air Flow Sensor

From Granatelli Motorsports is this innovative Mass Airflow Sensor for LT1 or LT4. This 50 state legal replacement unit features 47% more airflow capacity than the stock sensor, and state of the art hybrid electronics. The advanced, active electronics module packaged within the sensor provides improved control of both ignition and injector timing, contributing to a performance gain of 10-15 horsepower at the rear wheels. 3 Year Warranty. 85-96 High Flow Throttle Body Air Foil

- Adds 11 horsepower.
- Increases torque 12 ft. lbs.
- Boosts air flow by 40 CFM.

High flow throttle body air foil reshapes the air as it enters the intake plenum to produce more torque and horsepower. No other modifications are required. Emission legal in all 50 states (EO #235-1).

304520 (Except 90-95 ZR1) 31.40

92-96 LT1 Coolant By-Pass Kit

Bypass the coolant running through the throttle body by installing this simple bypass kit. With no hot coolant running through the throttle body, the air entering the engine is cooler, and cooler air has more oxygen which produces more horsepower. Simple installation.

BBK Power-Plus High Performance Throttle Bodies

- Your choice of 780 CFM or 1000 CFM

BBK throttle bodies start with a precision 356 aluminum alloy casting which is machined to exact tolerances. Then each unit is assembled with high quality BBK components such as an o-ringed shaft, double sealed roller bearings, precision die-stamped linkage assemblies along with factory quality fitting and connectors to ensure a perfect installation and life-long use. Includes mounting bolts and gaskets.

Power-Plus High Performance Throttle Bodies offer your Corvette's engine the best air supply available, funneling 25-35% more air than stock. 52mm pipes in 780 cfm (cubic feet per minute) or lease onto the 58mm and get a whopping 1000 cfm! 50 state legal (EO #D-245-7)

52mm-780 CFM

With a stock base or a ported base, the 52mm throttle body is adequate.

354116	85-88	52mm Throttle Body.....	463.50
354203	89-91	52mm Throttle Body.....	463.50
354082	92-93	52mm Throttle Body.....	463.50
354174	94-96	52mm Throttle Body.....	463.50

58mm-1000 CFM

For those who have modified tuned port motors and especially Mini-Ram equipped motors, the 58mm body flows just over 1000 CFM. **In most cases port matching to manifold is required.**

354291	85-88	58mm Throttle Body.....	463.50

354295	92-93	58mm Throttle Body.....	463.50
354317	94-96	58mm Throttle Body.....	463.50

LT1 Edelbrock Air Gap Intake

- Maximum Power from 1500-6500 RPM
- Increase of 5 HP over stock, intake and 52mm throttle body
- 11 HP over stock increase

Utilizing the proven short runner tunnel-ram style, this manifold provides the next step up in performance for LT1 and LT4 owners. These are both direct stock replacements for OEM equipment with all required emissions features. Edelbrock's patented Air-Gap™ design delivers a cooler and denser air stream for maximum power output. These intake manifolds are designed to work with either our 52mm or 58mm throttle bodies. Will work with OEM LT1 and LT4 heads with minor head port matching.

---------------	-------	----------------	---------------

Fuel System Helpers

84-91 Throttle Performance Switch

Not to be used with any other power chips

The 1984-1991 Throttle Performance Switch is designed to engage at 60% throttle in every gear. Once it's activated at 70% it delivers a full 4.6 volts to the computer. The computer reads this as a valid wide-open throttle signal and delivers maximum fuel and timing at that point. The result is an immediate improvement in acceleration that you can feel through the throttle. It has the factory connectors on each end, so it simply plugs into your factory TPS sensor in a series. Nothing could be easier for power. Not to be used with any other power chips.

354277 84-91 132.45

85-91 Fuel System Upgrade Kit

Kit includes:

354165 85-93 Accel fuel injector-stock 24lbs.

304520 85-93 Throttle body air foil.

304570 85-91 Adjust fuel pressure regulator.

354244 85-96 Fuel filter (can type).

304485 84-04 Fuel pressure test gauge.

If Purchased Separately 420.95

354362 530.25

Fuel Pressure Test Gauge

Allows you to precisely set fuel pressure. Conveniently connects to fuel rail via the Schraeder valve. Complete with 18" of hose.

304485 49.95

• Cannot be shipped by air or overseas

GM Fuel System Treatment Plus

- Cleans - Sulphur corrosion from fuel gauge sending units
- Prevents - Harmful sulphur components from attacking sensitive fuel system electronics
- Protects - By coating metallic surfaces of the fuel system
- Removes - Engine deposits left from use of poor quality fuels

365097 12 oz. 24.40

Mass Air Flow Sensor Cleaner

- Safely cleans and protects MAF sensors
- Plastic safe and leaves no residue
- Increases horsepower
- Decreases hesitation and pinging
- Improves fuel economy and MPG
- Reduces rough idle

104648 11 oz. 20.05

Throttle Plate and Intake Cleaner

Effectively cleans power-robbing gums and varnishes from throttle bodies and air intake systems on fuel-injected vehicles. Improves performance, eliminates hesitation and rough idling while lubricating all moving parts. Safe for use on coated throttle bodies. For maximum performance and MPG use CRC Throttle Body Cleaner and CRC MAF Sensor Cleaner (Item # 104648) every time you service your air filter.

354314 11 oz. 12.95

Lucas Octane Booster

A real Octane Booster! Tested and proven to deliver three times more boost than most other brands. Lucas Octane Booster is a genuine performance enhancer! It's safe for turbos, oxygen sensors, and catalytic converters. Stops knocks, and raises MPG in high compression engines. One bottle treats up to 25 gallons of fuel. Not street legal. Safe for any gasoline engine.

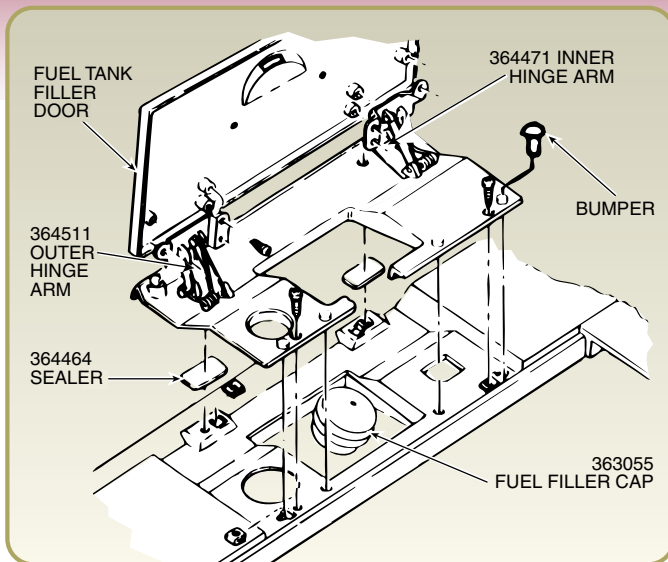

351136 15 oz. 12.25

Red Line Fuel System Cleaner

SI-1's injector and valve detergent is a concentrated package of the most powerful high-temperature detergents available to clean gasoline fuel injectors or carburetors, intake valves and combustion chambers and can clean injectors to nearly 100% efficiency in one treatment. The cleansing effect on injector deposits can raise fuel economy approximately 12% or even greater, depending on the condition of the injectors.

354313 15 oz. 15.95

84-96 Gas Boot Drain Kit

If a pool of water exists in your gas filler boot, you risk getting water sucked into your tank. And the factory gas boot drain is too small and mounted too high to completely drain. Get rid of that water with a gas boot drain kit. This kit mounts flush, allows total drainage without clogs, and keeps the boot completely dry. Installs in about 15 minutes - minor drilling required. Includes all necessary hardware and instructions.

Gas Tank Repair and Liner

Gas Tank Repair And Liner Kit

- Seals leaks and stops rust.
- Fuel Tank Cleaner - Cleans your fuel tank to be sure that all fuel and residue is out of the tank.
- Tank Prep - This gets your tank ready for the liner to be applied. To be used after the cleaner has dried.
- Fuel Tank Liner - Forms a tough flexible membrane that won't crack or flake, seals leaks and prevents rust.

Not recommended for tanks that have been coated on the inside from the factory.

84-89 Instrument Cluster Repair Service

- Saves Expense Of New Cluster (Over \$1,500)
- Restores Cluster To Perfect Working Condition

If your car is turned off and you can read the numbers on your dash, your LCD display glass is defective.

You hit a bump and the instrument cluster may go completely dead or dark with the high-beams and turn signal indicators on. Hit another bump and it comes back on. These are some of the symptoms of a defective instrument cluster. Other symptoms include random display of a few segments only, which may or may not be accompanied by a burned-out "LCD" fuse. Frequently, a defective instrument cluster will drain the car's battery in a day or two. Hitting the cluster won't help, and you could break one of the very thin and costly glass displays, resulting in a substantial additional expense. Don't pound on it! Fix it now!

Send your dash unit to us for complete electronic rebuild (remove odometer). 7 new light bulbs included (only correct #882's are used). 2 week turnaround time. All work guaranteed for 90 days. OD numbers are not replaced. NOTE: There is a \$75.00 diagnostic fee if customer decides not to have cluster rebuilt.

254136	Rebuild service (ND) Plus Parts	389.00
	Rebuilt price is for labor only. Allow 4 weeks for service.	
There is an additional cost to replace broken, cracked or sunfaded LCD's.

84-89 DIGITAL DASHES

The 84-89 digital dashes are not all the same. They break down as follows:

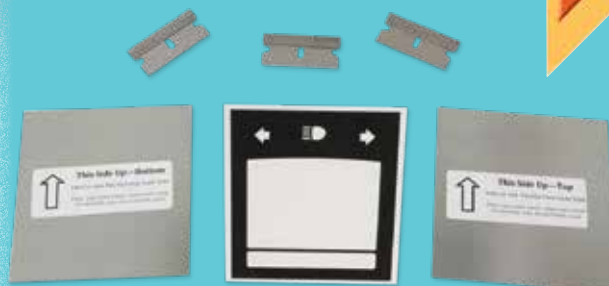

LS 84 w/cruise	LAW 86 w/cruise	LBT 87-88 Exc. cruise
LT 84 Exc. cruise	LAX 86 Exc. cruise	LDL 89 w/cruise
LAK 85 w/cruise	LBS 87-88 w/cruise	
LAL 85 Exc. cruise		

This code can be found on the label on the back of your instrument cluster.

90-96 LCD Instrument Gauge Panel Restoration Kit

NEW

This is a high quality polarizing film which is used in the manufacturing of LCD's. It has a matte finish, anti-glare coating to decrease reflections from external lights (e.g. sunlight, headlights, etc.) and a hard coat to resist scratches. The film contains UV protectant to minimize fading.

The graphics overlay professionally cut vinyl with a matte black finish. When applied, they look and function identical to the factory graphics.

84-89 Digital Dash Conversion Kit

- Customer Installed Kit
- Includes Blue and Teal Lens
- Disables Factory Cruise Control

Experience high tech instruments with clear, bright, precise digital read-outs in blue against a black background. Update your existing 84-89 dash cluster with a complete kit that includes all components to make the following digital read-outs: 0-255 mph speedometer, 0-9999 rpm tachometer, 0-90 Psi oil pressure, 0-300°F Water temp, 8-17 V Voltmeter, 0-99% fuel gauge and odometer w/trip. Included are compatible sending units, wiring and a control box that allows speedometer and odometer calibrations to be made at dash for infinite accuracy regardless of tire size or gear ratios. Also featured is a demo mode to display gauge system without starting engine. Conversion requires removal of instrument cluster.

84-89 Intellitronix LED Digital Gauges

This LED Direct Replacement Digital Dash is easy to install. This digital dash display is made specifically to fit 1984-1989 Corvettes. This LED digital dash can be purchased with a red, white, blue, or green LED display. The long-lasting, super bright LED's allows for an easy readable dash display complete with a smoked Plexiglas face which keeps the LED display from being too bright or causing glare.

9 different parameters can be closely followed with these digital automotive gauges: speed, RPM, water, oil pressure, air/fuel mixture, fuel level, voltage, transmission temperature, and oil temperature. Certain gauges do require the additional purchase of a Sending Unit Push- button calibration allows for new tires, wheels, and rear ratios, and temperature presentation is available in either Celsius or Fahrenheit.

Each Intellitronix Direct Replacement Digital Dash comes with a lifetime guarantee and everything you need for installation including a step-by-step manual and tool kit.

84-96 Rear Window Hatch Vent

Keep your interior cooler and reduce cockpit turbulence!

The rear window hatch vent is a secure heavy duty metal bracket that raises the back of the rear window 1-1/2" from the closed position. The opening provides flow-through ventilation, reduces cockpit air turbulence, and reduces interior temperatures as much as 10°. The bracket installs in seconds using your roof panel ratchet to secure it to the lock striker. No modifications are necessary, and the bracket does not affect operation of alarm system or interior lights.

84-87 Headlight Actuator Motor Upgrade Kit

The only sure way to eliminate the troublesome operation of the original 84-87 electric headlight actuator motors, wiring, and 3 relay operating system.

- No work under the dash, no work under the car, no wheel removal
- No cutting or modifications to original equipment
- Kit contains a complete new headlight motor wiring harness
- Includes easy to follow complete instructions
- Includes new updated 1988-2004 headlight actuator electronic module
- Includes new 2000-2004 style headlight motors

The original headlight motors are unbolted and removed, and the new mounting brackets and motors are bolted in! Really "Plug and Play". One Year Manufacturers Warranty.

444358 757.55

Non-Popup Headlights

You can have a custom and more aggressive look for your C4 with Breathless Performance's non-popup headlight system. Includes brackets made from 60-61 aircraft aluminum with DOT-approved low beams mounted using a bubble level for adjustments, CATS performance high beam lights, and headlight tubs manufactured of ABS with a tough acrylic molded lens cover. Allow 20 minutes to remove the original headlights and about 1-2 hours to install the new "pre-mounted system." Low beam wattage is 130, with high beam wattage rated at 280.

84-96 Rebuilt Headlight Motors

Quality material and expert craftsmanship will produce trouble-free performance. Headlight motors are rebuilt and include new drive gears and complete electrical overhaul. Ship us your motors and they will be disassembled, cleaned, repaired, lubricated, and tested. Each restoration is performed individually and is warranted for one year. **If case is cracked motor cannot be rebuilt. There will be a \$50.00 additional charge if, the motor is not removed from the headlight bucket.**

444337	84-87	(L or R) (Rebuild Service Only) (ND)	175.50
444261	89-90	(L or R) (\$150.00 Core Charge) (ND)	186.50
444360	91-96	(L or R) (\$150.00 Core Charge) (ND)	186.50

88-96 factory headlight motors contain a drive gear that is gel packed, and it is this packing that fails and allows the motors to free wheel. The repair kit contains 3 Delrin bushings that replace the gel and allow the motors to operate properly. Easy installation — one kit needed per motor. Instructions included.

444359	(Set of 3)	7.75
---------------	-------------------------	-------------

84-96 Headlight Gears

Headlight gears often self-destruct and GM's solution is to sell you \$400 worth of new headlights. Replace failed headlight gears with heavy duty gears and avoid the high replacement cost of replacing all the parts.

R-134a Conversion Kit

Retrofitting your vehicle to non-ozone depleting refrigerant protects our atmosphere. This kit allows you to convert your A/C system from R-12 to R-134a usage in a cost effective manner. Only three additional steps to the R-12 service procedure are needed to convert to R-134a. Includes new D-rings, Ester oil and instructions.

84-96 Emergency Hood Opening Tool

Pop That Stuck Hood
in Seconds!

The Hood Opening Tool was designed by famed Corvette Plant Action Center Engineer Gordon Killebrew specifically for the 1984-1996 Corvette hood. It used to be a major operation to open a late model hood if the cable breaks. Now all you need to do is open the driver's door, insert this tool at the hinge area, twist, and up pops the hood. Every Corvette owner and shop should have one of these. Comes with instructions.

464060.....	29.50
-------------	-------

Hood Acoustashield

5 piece pre-cut insulation with a molded ABS plastic cover completes the underside of your Corvette's hood. The plastic shield is die-cut and available with or without a molded logo to match your Vette. The ABS plastic can withstand up to 250 degrees.

HELPER

Help us so we can help you

When looking for technical help, there are several things to keep in mind. First of all, it is very difficult to help customers with indepth technical problems if they aren't well informed. Please review your service or assembly manuals before you call — this will make solving the problem much easier.

Emergency Hood Release Cable

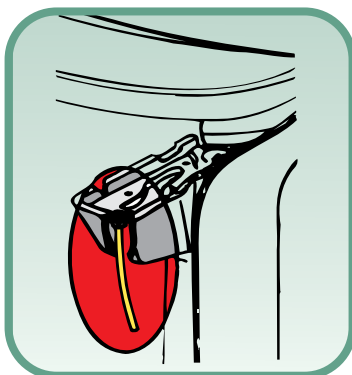

Nothing is more frustrating than having a Corvette hood release cable snap on your C4! We have seen this happen too many times. Now you can open your hood at any time by simply pulling on your Emergency Lanyards. Installation is fast and easy.

464101.....27.65

84-96 Hood Latch Drain Kit

Protect your hood latches from a perpetual problem. Rain or car washing cause water to collect in the female hood latches so rust can form and metal break-down can occur. To prevent this, use this handy kit which comes complete with 1 drill bit, 1 tap, 2 drain fittings, 2 drain hoses, and installation instructions.

464050.....INQUIRE

84-96 Underhood Light On/Off Switch

No more dead batteries in your C4 Corvette from leaving your hood open too long. Easily installed harness allows hood lights to be turned off with a simple flick of a switch. No need to disconnect your battery. Now your hood can be left open as long as you like for engine detailing, service, or car shows.

464075.....110.35

GREAT FOR WORKING UNDER YOUR HOOD OR AT CAR SHOWS!

Note: 91-96 cars have a separate fuse for the hood lamp located by the LH parking lamp under the hood. This fuse can be pulled to turn off the underhood lamp.

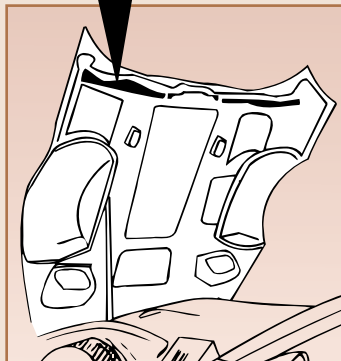

84-96 4-PC Hood Seal Kit

Reduce hood vibration, squeaking, and scuffing.

• Black Felt Material

Reduce hood vibration, squeaking and scuffing with these hood seals. The seals are OEM equipment for 93-96, but can be used on all 84-96 Corvettes. Adhesive backing allows for easy installation.

314182.....24.90

Hi-Rise Hoods -
See Page 106

84-96 Stock Hoods

If your Corvette has front end damage, you can save hundreds of dollars from GM's cost with an 84-96 reproduction hood. High quality construction and durable finish. Smooth, seam-free inner retainer panel assures easy prep and painting.

1984-96 Driver Black Leather Sport Seat Covers

If you think quality at a budget price is impossible, think again... and save! Driver Leather Seat Covers provide you with expertly crafted leather seats at a great price! Currently available in black only, these covers are made from grained hides with natural markings. While not the answer for a true restoration, they are perfect choice for the budget-minded every day driver! Each set includes 2 backs and 2 bottoms.

Looking for new 84-96 seat covers? You could buy everything separately and do all the work yourself. Or you could let Corvette Central take care of everything for you with a set of 84-96 mounted seats. Who knows better how to install seat covers than the manufacturers? Put their skill to use — the professionals will take care of the hard part for you! You get the greatest value for your restoration dollar when you order our 84-96 mounted seat covers. Price includes a set of seat covers (2 bottoms and 2 backs) in the color of your choice, 4 pieces of seat foam, all the seat cover installation hardware needed, and all labor. When your mounted seat covers arrive, all you have to do is snap them into place! What could be quicker and easier than that? 84-96 mounted seat covers are available in two great choices: 100% leather seat covers or, for an economical alternative that looks like the original, try our leather-look seat covers. Leather-look seat covers give you the look of original leather at substantial savings!

1988-1996 Door Sill Carpet

• Available In Colors

If the carpet sills are worn on your 1988-96 Corvette, replace them quick and easy with these molded sill carpets. Original cut pile carpet is molded to correct shape, but will have to be trimmed to fit.

- 134368 88-89 Pair 88.30
- 134340 90-93 Pair 137.95
- 134360 94-96 Pair 151.40

Sill Plates – See Page 142
Front Speaker Cover Carpet – See Page 155

These replacements match original carpet mats and have color-coordinated bindings and skid-resistant rubber backings. They have the same cut-pile construction and colors as your original carpet. Note: Due to a difference in dye lots and the fading of original carpets, we cannot guarantee an exact match.

Contoured HD Floor Mats

Newly designed heavy-duty contoured floor mats designed to look good AND protect your Corvette's carpet. These floor mats feature a heavy waterproof rubber backing that is "formed and contoured" to fit inside the foot well but raised on the sides to protect your carpet from spills and soil that would normally slip past traditional floor mats. Manufactured using original style Cut Pile carpet, these floor mats do not look like an after thought, but a factory option. Available in all original colors for a perfect match.

84-89 Interior Door and Armrest Saver

The armrest saver for 84-89 Corvettes is designed to prevent the door panel armrest from pulling away from the door panel. Kit includes inserts for both left and right door panel hand grab areas. Instead of pulling on the vinyl armrest, now you will be pulling on 16 gauge steel which is connected directly to the inner door structure. This prevents vinyl armrest damage or further damage if your armrests are already beginning to show separation or distortion. Instructions included for simple installation.

Power Seat Track Rebuild Service

Search "C4 Corvette Cutaway
Seat Tracks" on YouTube
for More Info

If your Corvette's power seat motor "runs", but won't move in position (forward to rear or up & down), your track gears are most likely stripped. GM replacement gears are not available. Just call for our seat track rebuild service which features new gears and bushings. You can send in your unit for rebuild, or we can send you one for exchange, which will include a refundable \$150.00 core charge.

484459 84-87E Round Pin Plug..... 247.15

484540 87L-96 Square Pin Plug..... 247.15

The above products will have a \$150.00 core charge added to them if your core is not received before the time of order.

84-96 Seat Belt w/Retractors "Direct Fit"

Seat Belt Sets are "Direct Fit" and will bolt in with original hardware. All components meet or exceeds FMVSS 209/305. Seat Belt Set includes two complete seat belts for the front including buckles. Please note OE front buckles are wired and can be used with this set. Seat Belt Sets come in most of the OE colors. ★Specify Color★

84-96 Cockpit Air Filter

Fits the 84-96 external cowl vent air inlet to reduce air pollutants (dust, pollen, etc.) and external foreign matter into the cockpit. Filter can easily be removed and cleaned, and fragrances can be periodically applied on filter as an air freshener.

314184..... 19.95

90-96 Coupe Brey-Krause Harness Mount Bar

- Type 304 Stainless Steel
- Powder-coated in durable black wrinkle-finish
- 21 lbs.

This harness mount bar properly locates and supports racing shoulder harnesses relative to the driver. In the case of an accident, it helps protect the driver's shoulders and spine. The harness guides also prevent excessive shifting and fatigue of the driver during the high G loads of cornering and braking. Bar attaches to factory mounting points in "B" pillars. Support rods attach to outside lap belt mounting point.

484566 (ND) 833.25

Sport Latch & Link System Racing Seat Belt Harness

- 5 Point Race Belts, SFI Tagged and Certified

Sport Latch & Link belt system uses drop-forged alloy steel latch and link mechanism Latch and Link and includes high-quality adjusters and pulls. The Sport harnesses have polyester webbing, which still offers maximum protection with minimum elongation and passes SFI 16.1 certification. Belts are pull-down with wraparound belt mounts but interchangeable bolt-in brackets are included.

91-96

- Adds a Unique Look (When Lit)
- Provides Additional Safety
- Does Not Require Cutting Stock Harness

A Bright Idea for Your C4

If you're looking for a way to set your C4 apart from the rest, we have a new set of L.E.D. taillights that will brighten things up. Taillights feature L.E.D. bulbs that are much brighter than the factory units and have multiple light sources around the housing as well as in the center of the lens. These taillights fit C4 models and easily plug into the factory wiring harness and bolt in place. It's an easy way to upgrade your Corvette's appearance while adding a measure of increased safety.

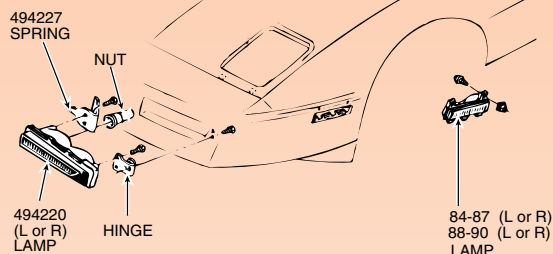

Set includes 4-Red L.E.D. Tail Lamps and 4 Load Equalizers.

HELPER
TAIL LIGHT BULB
CHANGING ON 84-90

Changing procedure: (Exc-90 ZR1)

1. Remove license plate.
2. Remove both backup lens assemblies, two 7mm screws on each lens assembly.
3. Using a 1/4" ratchet with a 1" 10mm socket, reach up through the license plate opening and remove the two 10mm screws holding the inside housing to the bumper.
4. Once the screws are removed, pull the housing out, push the lock tab in, and then turn the socket counter clockwise. Remove and replace bulb.
5. To access the outer bulbs, reach through the inside housing opening and remove the socket from the outer housing. The wire is long enough to pull through the inside housing opening.
6. Reverse the process and you have changed the bulbs without getting under the car or taking the bumper and exhaust loose!

Electrical components such as coils, spark plugs, wires, ECM's, switches and sensors are

NON-RETURNABLE PARTS

Always refer to a factory service manual when diagnosing engine service problems. You can damage electrical components if the proper procedures are not followed. Be sure you are replacing the correct part.

84-96 Daytime Running Light Kit

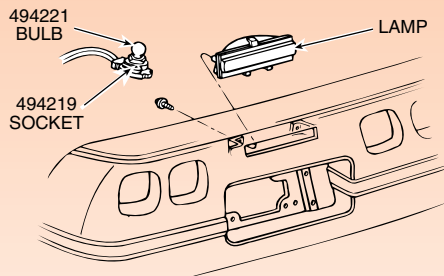

- Easy Installation
- Works on All 84-96 Corvettes
- State of the Art Circuitry
- Select Between Synchronized and Non-Synchronized Mode

Now you can add daytime running lights to your 84-96 Corvette. Make your car more visible to oncoming traffic. Daytime Running Lights are an inexpensive addition that will improve safety, and give your car an updated appearance.

The module connects to your turn signals and automatically controls when they should be on. During the day, they function as DRL's (Daytime Running Lights), but turn off when you turn on your lights. The normal turn signal functionality remains intact at all times.

86-96 Security Ignition Key

• Specially Coded

To order a key, have your local GM dealer measure the resistance on your key (it will be a 1 thru 15 value code) and add that code to the part number listed below. We'll ship you the correct key which can then be cut by a local locksmith.

504371	*Specify Code 1 - 15*	17.50
---------------	------------------------------------	-------

86-89 Vehicle Anti-Theft Bypass Switch

Bypass the VATS!

The VATS system has kept many thieves from starting 86-89 Corvettes, but it has also stranded a lot of owners! If the system malfunctions, you could face high towing and repair charges. This vehicle anti-theft bypass switch allows you to switch the VATS system on or off with a hidden switch. The control module plugs into the stock harness and mounts easily. The on/off switch mounts in a hidden location with supplied Velcro. Includes instructions. To order, have your local GM dealer measure the resistance on your computer key (which will be a 1-15 value code) and **specify code when ordering.**

594361	86-89	71.75
---------------	--------------------	-------

Bypass the VATS!

86-89 Security Override System

Eliminate malfunctions with the VATS key system on your 86-89 Corvette with this security override system. Now you can enable a sure start with this module which fits under your dash and actually deactivates the VATS unit. Simply plug the module into a harness at the base of the steering column — no cutting or splicing for installation. Nothing shows to let anyone know the VATS has been deactivated. Includes all necessary materials and instructions. To order, have your local GM dealer measure the resistance on your computer key (which will be a 1 through 15 value code) and **specify code when ordering.**

HELPER RADIO'S

AMP Failure - No sound from individual speaker box or popping, squealing, hissing, etc. sounds (but, no music). Solution: Replace AMP unit (should replace in pairs to maintain sound compatibility). There is no satisfactory way to repair used AMPs, they will fail!!

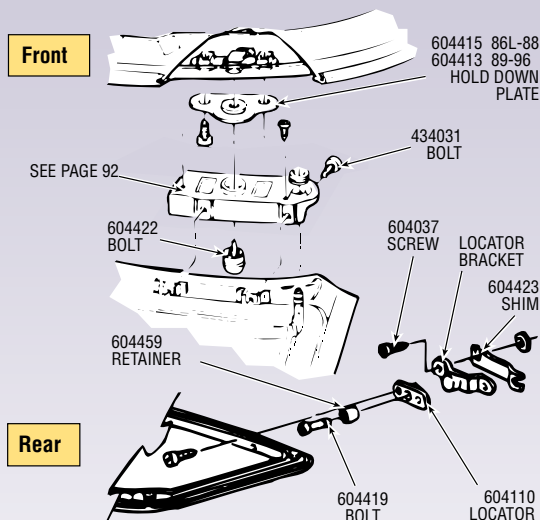

Speaker Relay - Customer hears a loud "pop" when the radio is turned on & battery will probably drain overnight. Solution - Replace relay with Part #244409 84-89, #594343 90-96. The relay is located under the right dash (84-89); right of the steering column (90-92); right rear storage compartment (90-96).

Head Unit - Will not take a CD/Cassette or shows "err" on the display. The unit needs to be rebuilt.

90-96 Receiver Amplifier - If there is no sound from any speaker and no radio operation then the radio receiver may have failed. Customer should check both fuses before going further. The receiver is under the right dash panel (90-92) or in the right rear storage compartment (93-96).

Poor Radio Reception - Replace antenna, which is the most likely problem due to poor grounding. Also, suggest replacing the entire assembly, as the repair kits will not solve the problem and the cost of a new antenna is not that much.

84-93 Automatic Shift Control Harness

Improved Performance
for Automatic
Transmissions!

534293 Shown

If your 84-93 Corvette's automatic (700R4) transmission is shifting up and down when driving at "in-town" speeds, the shift control harness will solve the problem! No more erratic shifting or "hunting" for gears. The In-dash installs under the passenger dash in minutes. The Undercar unit plugs directly into the existing harness on the transmission. Both units are switchable for your convenience. Complete instructions included. Legal in California for racing applications only. **See our WEBSITE for more info on which one to choose.**

B & M Shift Improver Kit™

• For Automatic Transmission

B&M has developed a transmission shift kit that provides crisp shifts and eliminates shift overlap on your stock transmission. This kit will also improve transmission life by reducing excess wear on clutches and bands. Easy installation, requires removal of the transmission pan and valve body. Transmission removal is not required. At the time of installation, you may select one of two stages of shift modification.

Stage 1: Heavy Duty – Provides firm positive shifts without loss of driver comfort. Recommended for street use.

Stage 2: Street/Strip – Provides very positive shifts for high performance street use or competitive events. Shifts will be the hardest, quickest shifts possible.

Torque Converter

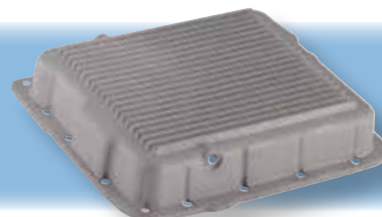

- Quicker Acceleration
- Improved Low-End Power
- Smoother Running
- Fully Streetable (No Modifications Required)

This exciting series of torque converters is designed with the enthusiast in mind. Economically priced and intended for use in mildly modified engines. Improves driveability and offers smooth in-gear idling without adversely affecting gas mileage.

Performance Clutch Kits and Flywheel

Stage 2

Stage 3

Flywheel sold separately

Stage 2: Recommended for cars up to 475 RWHP running a 1-piece aluminum flywheel. The clutch kit is designed for mainly street use with light to moderate racing. The clutch pedal is similar to stock with very smooth engagement characteristics.

Stage 3: Recommended for cars up to 650 RWHP and auto crossing or drag racing and running the lightweight aluminum flywheel. The clutch kit is recommended for the high hp Corvette's and auto crossers and drag racers in excess of 400 hp. Although the Stage 3 setup is better suited for racing applications, it is still a very streetable clutch. The clutch pedal feel is similar to stock with moderately aggressive engagement characteristics.

• = This flywheel needs to be balanced with the pressure plate as an assembly. this should be done with all flywheels.			

RAM Clutch Conversion Push Style Kit

Eliminates the factory pull clutch system for unlimited upgradability!

RAM clutches system replaces the limited capability pull style clutch/ dual mass flywheel system in C4 Corvettes. The RAM system consists of aluminum flywheel, Hi-Clamp pressure plate with 2800-pound clamp load, and your choice of clutch disc. An internal hydraulic bearing replaces the factory release mechanism to complete the install. This system is capable of up to 700 horsepower holding capacity!

Note: Eliminating the dual mass flywheel and using the semi-rigid hub in the RAM disc will cause some gear rattle in the driveline under light load.

Stock Matched Clutch Kits

Includes disc, pressure plate, throw-out bearing and alignment tool

If your Corvette's clutch is slipping, or just worn out . . . don't despair! All new Matched Clutch Assembly consists of clutch disc, pressure plate, and throw-out bearing. **All parts meet or exceed OEM specifications.** No more having to guess which parts will work together — it's all in one box. No more extended down time.

1984-1988 CORVETTE

5 SPEED OVERDRIVE

"Say Goodbye To The DNE 4+3"

SILVER SPORT Transmissions

PerfectFit™ is an SST exclusive and here's why...

- 30-50% percent increases fuel economy are common
- Greatly reduced driver fatigue- road trips are fun again!
- Long engine life
- Reduced NVH (noise-vibration-harshness)
- You will want to drive your Corvette much more than ever before!
- Shifter comes up to the proper factory location in console
- Shifter stub duplicates factory appearance with correct angle
- Compact shift tower for best fit
- Crisp shift with short throw
- Reproduction parts for factory look

Low RPM Cruising Gear Overdriven 5th gear provides comfortable highway driving, improved fuel economy, reduced wear and tear on engine and accessories. Several ratio choices are available.

The TKX has a rounded case and is streamlined to the max to fit inside tight transmission tunnels with no cutting in most applications. The shifter plate has a low profile and the shifter is nice and compact. It's pretty perfect right out of the box, but if you need a shorter throw or a PerfectFit™ shifter location, Silver Sport Transmissions is ready with an STX Shifter®.

Specifications:

Torque Capacity - 600 lb-ft

Shift Capacity - 7,500 rpms

Input Splines - 26

Output Splines - 31

Shifter Positions - 3 (Over 25 with STX Shifter Upgrade)

Speedometer Output - Mechanical and Electronic

**Shipping in Continental USA
approx. 165.00**

Bolt-in replacement for the Doug Nash 4+3 transmission based on a custom designed Tremec TKO transmission. You will find this transmission perhaps the single most significant improvement to the reliability, driveability, performance and operating cost of your Corvette. Please specify the following when ordering:

- Year of Car
- Engine Size and Horsepower
- Rear Axle Ratio (Example 3:11)
- Tire Size

12 month product warranty - includes 24 month activation delay so you can finish your project.

A41 4 Speed Automatic Transmission Basic Builder's Kit

This is the basic builder's kit, cutting and/or fabrication will be required for installation.

A41 Ratio: 3.06, 1.63, 1.00, 0.70

Available in three stages:

- Stage 1 - 450 Torque
- Stage 2 - 550 Torque
- Stage 3 - 650 Torque

Features:

- Low RPM Cruising
- Great Shift Quality
- Dyno Tested
- Electronic Controller
- Lockup Torque Converter with Optional Stall Speeds
- No Tunnel Cutting

**Shipping in Continental USA
approx. 255.00**

Each Basic Kit comes with the correct components for your application and will include the following parts:

1. Automatic Transmission - A41 (GM 4L60E / GM 4L65E Aftermarket replacement)
2. COMPUSHIFT Sport Controller
3. Dipstick and Tube - OEM Style
4. Auxiliary Oil Cooler - High performance for Stage 2 and 3 only, Optional purchase for Stage 1 kits
5. Bellhousing
6. Lock Up Torque Converter - Electronically controlled, stall options available
7. Throttle Position Sensor - Bolt-on unit provides throttle feedback to the computer with just 3 wires
8. Rubber Cooler Lines
9. Speedometer Cable - Mechanical Speedo Cable
10. Hardware - High strength grade 8 fasteners standard
11. Wiring - Plug & Play wiring harness
12. Inspection Cover
13. Slip Yoke
14. Reverse Light Wiring

HELPER STEERING IDENTIFICATION

If you do not know what type of suspension your Corvette has, look on the option label located in the left side rear storage compartment on 85 cars, and on the inside of the center console door on 86-96 cars. Z51 and Z52 option cars have fast ratio steering. Fast ratio steering has approximately 2 turns lock to lock and all stock ratio steering has 2-3/8 to 2-1/2 turns lock to lock. Further identification codes can be found on the gear assembly dust cover of the steering rack unit.

Note: 2 letter code is embossed into the bottom side of the rack housing on 84-89 racks.

- 84-85 Standard Steering Code YM
84-85 Standard Steering Code WL

Adjustable Upper Control Arms

Adjustable Upper Control Arms, adjust camber, caster or length for maximum handling and performance. These arms provide quick and easy adjustment for standard or lowered heights and will accommodate most air ride systems. Fine tune your handling and alignment while minimizing tire wear.

574663	84-87	Pair	606.05
574675	88-96	Pair	606.05

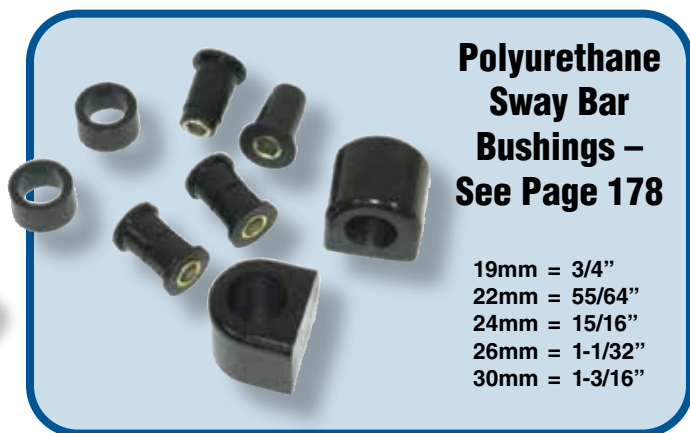

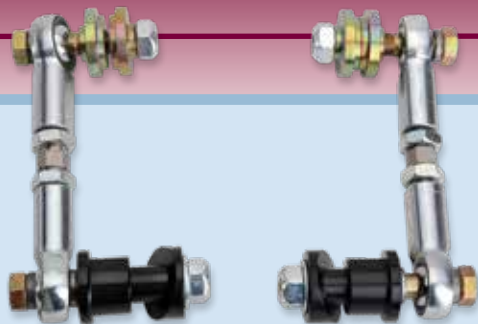

84-96 Adjustable Upper Control Arm

- Greaseable and Rebuildable Ball Joint
- 1/2" Extended Ball Joint for Improved Camber Curve
- Adjustable Camber and Caster
- Front Adjustment Range: Camber $\pm 3.0^\circ$, Caster ± 3.00

Patented design with the most adjustability and best clearance of any arm on the market to modernize the front suspension on your C4 Corvette. SPC uses a 1/2" extended ball stud to improve camber curve, now adjust in some caster and a bit of camber and enjoy the drive. Sold as pairs.

84-96 KYB Gas Shock Absorber

KYB high pressure gas shocks are an excellent choice when replacing shocks. KYB's provide high performance at a reasonable cost. Even under the most demanding driving conditions, KYB mono-tube shocks continue to deliver 100% shock absorbing efficiency. They are backed by a limited life-time warranty. **Cannot be shipped by air.**

Shock Kit- HQ Monotube Adjustable

- Smooth body shock kit
- Comfortable
- Road gripping performance
- Adjustability
- Race winning tunability
- Includes application specific mounting hardware, where needed, for simple no modification installation
- Built by Fox Racing
- Easy-access adjuster knob
- Single adjustable. This shock has a wide range of 26 click adjustment to change the rebound (extension) properties. By adjusting the rebound setting, you can optimize the ride quality even more as well as dial in more performance oriented handling characteristics.
- 1,000,001 Mile warranty

FX3 Shock Actuator Rebuild Service

The original plastic pieces in the actuator often break and are a cause of failure in the selective ride control feature of your Corvette.

The first sign of trouble is often the SRC "service ride control" light on the dashboard.

We offer shock actuator rebuilding in which we replace the two plastic pieces which turn the shock shaft with pieces machined from billet aluminum. The aluminum pieces are much stronger than the stock plastic ones.

574387 (ND), ea. 142.35

84-96 Bilstein Shock Absorber

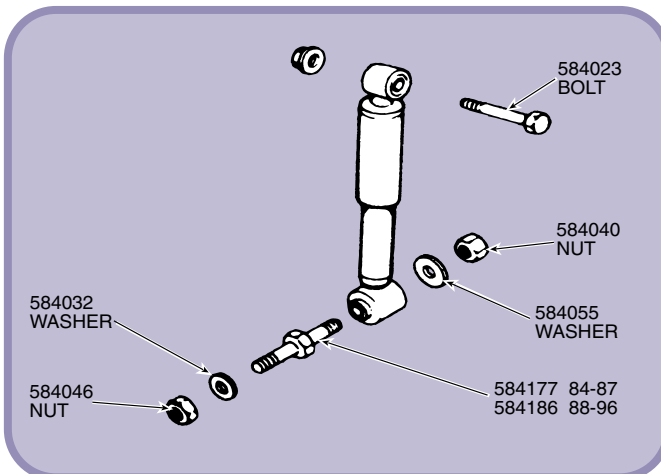

- High Pressure Gas Shock
- Our Best Performance Shock
- Limited Lifetime Warranty

Bilstein high-pressure gas shock absorbers offer all advantages of a gas shock, plus construction and performance features that are incomparable. Bilstein shocks feature a seamless, mono-tube construction for fast heat dissipation and finely machined components to yield the most sensitive valving available today.

Cannot be shipped by air.

88-98 Ridetech Streetgrip Suspension Kit

Update your 1988-1996 C4 Corvette's suspension with Ridetech's Streetgrip system.

The 100% bolt on kit features adjustable monotube shock absorbers, heavy duty sway bars and self-lubricating Delrin control arm bushings. Ridetech's excellent HQ Series shock absorbers are custom-valved to complement your C4 Corvette's factory springs for modern handling and ride quality. Impact-forged aluminum bodies and heavy duty steel shafts. You can fine tune performance by way of precision rebound adjusting knobs.

CNC-bent Musclebar™ sway bars increase bar rate over stock. Innovative investment-cast bar ends that perfectly engage end-link bushings as your Corvette's cornering loads change.

574729 (ND) 2,184.90

88-96 Coil Over System

- Ultimate in Corvette Suspension Personalization
- True Independent Suspension Tuning
- Precise Fit
- Hyperco OBD Coil Spring Technology
- QA1 Aluminum Adjustable Dampeners
- Hard Bar Engineered Aircraft Material Mounts

This 88-96 Corvette Coil Over suspension system provides the ultimate in suspension personalization. Fully adjustable ride height, 12 different dampener settings, and an array of spring rates allow the Corvette owner to obtain the look, ride and handling they want. Convert your composite spring platform to a true independent coil spring package. Included in this system are lifetime warranted Hyperco springs with "Optimum Body Diameter" (OBD) for the truest linear spring rates and quality available in the USA today. The system is engineered for street or track applications with optional double adjustable dampener upgrade (Over 500 settings).

574131	Single Adjustable - Street (ND)2,495.75
584207	Double Adjustable - Street (ND)2,652.75
574186	Double Adjustable - Track (ND)2,652.75

Camber Brace

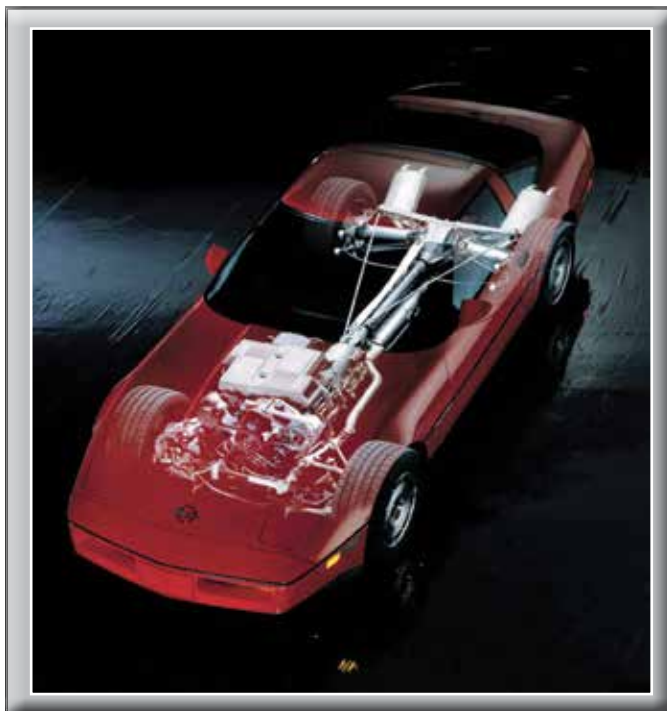

- * Improves Handling
- * Better Driver Feel
- * Precise Fit
- * Light Weight at 5.4 Lbs

The concept of the Camber Brace is to structurally connect the front upper control arm bulkheads together making the front end stronger. By doing so, you reduce suspension distortion for improved, more responsive handling. American made from chromoly tubing, tig welded, C-N-C machined attached flanges provide an exact fit. No modifications to install with basic hand tools and abilities.

184113	84-89 L98 Camber Brace 297.90

Performance Tuned Composite Leaf Springs

Computer Designed,
Track Tested and Race Proven

These front and rear springs are a direct replacement for the 84-96 Corvette. While maintaining and or restoring original ride height, the FE1 has a soft rated spring by GM specs. Or upgrade to the Z51 handling package. Designed for spirited street and light track driving, ride quality is slightly diminished.

584164 84-96 Rear Z51 Performance Spring (ND).....549.95

84-96 Suspension Lowering Kit

Thinner polyurethane front suspension wedges and longer rear spring bolts with adjustable nyloc nuts lower your car approximately 1". A lower center of gravity means reduced body roll and better handling.

584087.....63.95

Polyurethane Suspension Upgrades

Polyurethane Bushing Kit

This master polyurethane bushing kit replaces all the major suspension components without the search for part numbers and kits, but more importantly, without the high cost of purchasing the items separately. These bushings are constructed from a unique new chemical formulation producing super tough material which holds up through the most demanding conditions. Race proven, performance tested, Hyper-Flex is the new generation of polyurethane that is superior to all others. Does not include sway bar end or mount bushing

- = 84-89 Bushings are all the same size, 90-96 have different size for each end.

Why Choose Polyurethane?

Polyurethane, unlike rubber, is not molded to the steel outer shells. Instead of twisting like rubber, the bushings are free to rotate on sleeves like a bearing. This means the suspension cannot bind and become full floating, resulting in longer life and improved handling. Polyurethane construction withstands oils, ozone, salt, and other corrosive chemicals. All bushings are pre-lubed with graphite to inhibit wear and squeaks.

--------	------------	--------

84-96 Heavy Duty Adjustable Strut Rod Set

Lock in your Corvette's rear camber setting permanently. Poly adjustable rods give you 3 times the stock camber adjustment compared to stock adjustment cams. Set includes 2 rods, poly bushings, and all hardware.

584114	Polyurethane Ends-Pair	143.45
584166	Racing Heim Joint Ends-Pair	310.60

84-96 Rear Lower Control Arms/Strut Rods Kit

- Eliminates deflection compared factory rubber; maintaining consistent alignment for precise handling
- Eliminates added stiction associated with rubber and poly
- Incorporates Delrin bushings and R-Joint technology
- Retains factory camber adjustments via cam bolt
- Satin Black powder coated finish

584262 330.00

84-96 Rear Sway Bar Link with Heim Joints

Kit Includes:

- Solid Lower Control Arm Sway Bar Bushing
- Solid Bushings for Factory Style Sway Bars
- Heim Endlinks w/Hardware

Upgrade your factory C4 Corvette Rear Sway Bar Heim End Links. Eliminate any bushing deflection and get more out of your sway bar. Plus they are adjustable for lowered Vettes!

Start-to-Finish Discount

Our Start-to-Finish Program offers our customers doing a partial or complete restoration the best price, service, and selection for their project needs.

- Orders placed will receive a 5-15% discount on most items.
- Maintain your preferred customer status by spending only \$500 per year.
- To enroll, please inquire with our order department and place an initial order of \$2500 or more. The initial order will receive the Start-to-Finish discount.

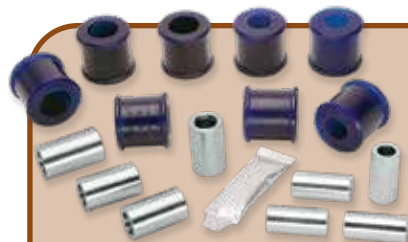

84-96 Polyurethane Rear Strut Rod Bushings

• Set of 4

Polyurethane pivots like a bearing and last much longer than rubber. Set of bushings (does 2 strut rods).

584153	84-89	37.55
584085	90-96	32.05

84-89 Bushings are all the same size, 90-96 have different size for each end.

84-96 Polyurethane Upper & Lower Spindle Control Rod Bushings

• Set of 8

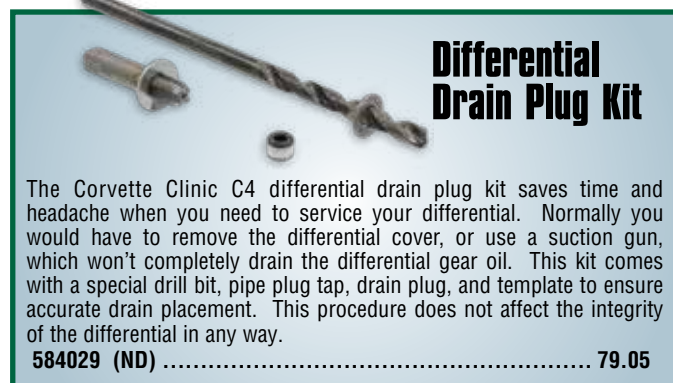

Polyurethane bushings provide positive spindle control rod positioning. Set of bushings with steel sleeves (enough for both sides, upper and lower).

Differential Drain Plug Kit

The Corvette Clinic C4 differential drain plug kit saves time and headache when you need to service your differential. Normally you would have to remove the differential cover, or use a suction gun, which won't completely drain the differential gear oil. This kit comes with a special drill bit, pipe plug tap, drain plug, and template to ensure accurate drain placement. This procedure does not affect the integrity of the differential in any way.

584029 (ND) 79.05

84-96 Differential Crossmember Bushings

• Set of 4

Replace those C4 Corvette worn out rubber bushings in the batwing differential crossmember mount with these solid aluminum or polyurethane bushings. Remove any differential deflection during hard acceleration or cornering that could affect suspension geometry.

584283 84-96 Aluminum Bushings..... 267.75

584124 84-96 Polyurethane Bushings 38.65

A multi-purpose, extreme high pressure lubricant recommended for manual transmission and positraction differentials. Lubricant features a chemical formulation that provides improved adhesion to moving parts to give you more complete lubrication to gears, bearings and bushings.

LOWER
GEAR RATIO = BETTER
PERFORMANCE

- A Great Way to Upgrade
- Professionally Rebuilt
- Gears Set to Factory Specs
- 1-Year Unlimited Mileage Warranty

Professionally rebuilt differentials are in stock and ready for drop shipment. Each unit is rebuilt with new ring gear and pinion, Timkin bearings and race, C/R seals, new positraction clutch pack with keepers, center pin, crush sleeve, new shims, ring gear bolts. **A core deposit will be added to the price of the differential.** This will be refunded upon receipt and inspection of a rebuildable core. A deduction on the core will apply for cracked cases, egg-shaped pinion shaft holes, broken ring gear bolts and broken gears. Note: Cores must be returned within three weeks of invoice date in order to qualify for any refund. Sorry, no exceptions. Cores must be complete and contain no broken parts to qualify for a full refund.

Body Control Module (BCM) Rebuild Service

The BCM is a critical component of the 90-96 ignition system along with the ECM/PCM.

The BCM then enables the starter relay and fuel pump relay, activates the ECM and the car starts. If the car will not even crank, then the BCM is most likely damaged. If it cranks, but starts and quickly dies, then the ECM is likely the culprit. Other symptoms include: no interior lights, partial display of the speedo, flashing SYS, no door locks, chimes, ETC-all interior body functions will be affected.

Security Override System Bypass the VATS!

Eliminate malfunctions with the VATS key system on your 86-89 Corvette with this security override system. Now you can enable a sure start with this module which fits under your dash and actually deactivates the VATS unit. Simply plug the module into a harness at the base of the steering column — no cutting or splicing for installation. Nothing shows to let anyone know the VATS has been deactivated. Includes all necessary materials and instructions. To order, have your local GM dealer measure the resistance on your computer key (which will be a 1 through 15 value code) and **specify code when ordering.**

Bypass the VATS!

The VATS system has kept many thieves from starting 86-89 Corvettes, but it has also stranded a lot of owners! If the system malfunctions, you could face high towing and repair charges. This vehicle anti-theft bypass switch allows you to switch the VATS system on or off with a hidden switch. The control module plugs into the stock harness and mounts easily. The on/off switch mounts in a hidden location with supplied Velcro. Includes instructions. To order, have your local GM dealer measure the resistance on your computer key (which will be a 1-15 value code) and **specify code when ordering.**

594361	86-89	71.75
--------	-------	-------	-------

594271

On 1984-89 Corvettes the biggest reason for non-working factory theft systems is failed modules. The easiest way to troubleshoot this problem is simple - if the security light on the dash board doesn't blink then 98% of the time you have a failed module. To correct the problem just plug in our factory original part. It's as easy as that! Sorry, returns are not accepted on this part.

Weatherstrip Kits Include Adhesive

Correct OEM Style Soft Latex Rubber

What is the Difference?

- Accurate OEM Style Soft Latex Rubber
- Latex Weatherstrip will not push out or bind door glass due to its softness
- These correct weatherstrips are included in our body weather strip kits

Our Latex Weatherstrip is an OEM-style reproduction made with the same materials as GM Weatherstrip. Developed with a softer compound, Latex Weatherstrip forms to the car better, not only giving you a better fit and creating a tighter seal, but it looks just like the original GM Weatherstrip.

The other weatherstrips you see listed in our catalog are an American made EPDM rubber. These are a correct reproduction of the original, a more dense sponge rubber with a smooth coating to ensure longevity.

C4 Wheel Identification

84-87 Michelin G-Force Sport Comp-2 255/50ZR16 Radial Tire

This BFGoodrich g-Force Sport Comp-2 POLY/STEEL tire is sized at 255/50ZR16 and features a W speed rating. It's the ultimate front and rear tire for your 1984-1988 Corvette. This includes fitment for standard, performance or Z52 Sport Handling Package with 16" wheels.

644292 Each..... 517.00

HELPER WHEELS

The 1984 through 1st 6 weeks of the 1988 (Non Z51 option) cars had 16" wheels with a 32-mm centerline offset (from the center of the wheel to the mounting surface). The 1988 introduced dual brake calipers. The 1988-96 use 17" wheels with a 56-mm centerline offset (ZR1 rears, 38mm offset). The 17" will work on earlier cars. They all have a 120.65-mm bolt pattern. If you use a 5-spoke ZR1 wheel on a regular Corvette, the tire will extend out past the wheel opening. Use the Collector or Grand Sport wheel. The offset is less than the ZR1 wheel and it will not extend out past the wheel opening. When cleaning the wheels, do not use any cleaners containing hydrochloric or phosphoric acids. If these acids get on your fiberglass springs, they may cause them to crack.

Wheel Aligning Tool

- M12 x 1.5 thread size, 200mm (7.75") long Lug Guide Tool
- Stainless steel
- Easily guide your wheels on and off your C4, C5, C6, or C7 Corvette without damage
- Protects your brake calipers, stud threads, and rotors
- A minimum of two (2) tools are essential, but we recommend three (3)
- Made in the USA

Aligning the holes in the wheel with the threaded holes in the wheel hub while inserting the first lug nut is particularly difficult. Lug Guide Tools are also useful for aligning wheel spacers or routine brake maintenance. Anyone who has ever struggled to mount a spare tire on the side of the road will appreciate this tool. Keep a Lug Guide Tool in you glove compartment or tool box.

645275 Each.....26.55

SCORPION

Cray wheels are made specifically for Corvettes – and only for Corvettes. Cray wheels even accept the original Corvette center cap plus you can use the original Corvette air sensors. Since Cray wheels are specifically designed for Corvettes they are available in the perfect width and offset for your Corvette.

HELPER WIPER ADJUSTMENT

All 1984-96 Corvette wipers will probably need a periodic adjusting. By removing the screen plug above the wiper motor you can loosen two 10-mm nuts on each arm and move them to any position as needed.

The correct setting is:

1. The left wiper blade should come 1" from the black windshield post molding with wipers on high speed, wet windshield, and engine running.
2. The right wiper-blade tip should come 1-1/2" from the windshield post molding.

Wipers adjusted correctly will not hang up. On the 1984-94, use a flat screwdriver to unsnap the wiper blade from the arm and rotate it 180° once a month. This keeps the blade from jumping or skipping on the windshield.

Wiring and Related

84-89 Door Reading Lamp Repair Harness

Saves the purchase of a complete lamp assembly. Provides replaceable switch with plug-in pigtail.

664002 23.30

Wire Harness Loom Conduit

Protects wiring from crushing and abrasion. Made of polyethylene, it is temperature, weather, and corrosion resistant. Black conduit organizes loose wires and has a seam that opens for easy wire insertion and closes tightly, even when conduit is bent or twisted. Available in three sizes.

663335 3/8" I.D. x 5' long 11.10

663337 1/2" I.D. x 4' long 11.10

663381 3/4" I.D. x 3' long 12.30

Use 664486 Tape to seal the ends as the factory did.

86-89 Power Door Lock Switch Repair Harness

Don't buy a new door panel wiring harness — just order this repair harness and save. Harness is color-coded to match the stock harness for easy installation. Just snip out the old and wire in the new.

REBUILD ORDER FORM

It is common for extra parts to be required to complete a rebuild that are not included in the listed rebuild charges. The prices on these extra parts vary. If it is less than \$35.00, you will be billed for the extra parts and the rebuild service will be completed. Please include a current email address and phone number in the event we need to reach you for charges exceeding \$35.00. If you refuse the extra costs, you will be charged \$25.00 for the time the rebuilder spent to disassemble the part and diagnose the problem.

Ship the part via UPS if possible and insure the package in case of damage enroute. Put at least 3" of packing material surrounding the complete part. Write rebuild on the outside of the box. Please include this form filled out with your information. We will contact you for billing info upon receipt.

C4 Production Numbers

By the time 1982 rolled around, the C3 Corvette was 14 years old and the chassis that it was based on dated back to 1963. Needless to say, a lifetime for a chassis and body style. The Corvette team at GM was well aware of this, and had been working feverishly on the next generation car. Unfortunately, development and quality control issues prevented them from introducing the C4 Corvette until March of 1983, 6 months beyond the typical September new model introduction. In short, no 1983 Corvettes were ever offered to the public; the C4 was introduced as a 1984 model.

As GM was still struggling with ever-increasing emissions regulations, the focus for early C4 Corvettes was on handling and chassis dynamics. And they delivered, so much so that there are still many competitive C4's at sanctioned racing events across the country. Right out of the box, the C4 was a capable corner carver, and when the Corvette team increased power substantially in 1992 with the second-generation LT1 (300HP), the Corvette was a force to be reckoned with.

Notable C4 Corvettes are the early models with the unique Doug Nash "4+3" overdrive manual transmissions, the 1988 35th Anniversary model (pictured), the incredible and highly anticipated ZR-1 supercars of 1990-95, and the Grand Sport and Collector Edition models from 1996, which sported a one-year only 330HP LT4.

Model Year	Coupe	Convertible	ZR-1	Total
1984	51547			51547
1985	39729			39729
1986	27794	7315		35109

Our primary product is your satisfaction

Customer satisfaction has always been one of our main objectives. We aren't talking about a no hassle return policy here – everyone claims to have that. We are talking about remedies for products that don't seem to fit or work right. We have over 48 years of experience in the manufacturing and sales of Corvette parts. This unparalleled background assures our customers that the products they purchase are the best available, and if a problem should arise, we know how to help.

Product assistance hours: Monday thru Friday, 9:00 to 5:00 ET.

When looking for product assistance, there are a couple of things to keep in mind. First of all, it is very difficult to help customers with in-depth technical problems if they aren't well informed. Please review your service and assembly manuals before you call. This will make solving the problem much easier. Secondly, whether you are doing the work or having it done, be sure to call us at the first sign of trouble. It's very hard to resolve a problem after the part in question has been damaged, no matter who's at fault. Let's be fair, everyone makes mistakes. The important thing is working together to resolve them. Owning your Corvette can be a very rewarding experience. We also understand how frustrating it can be when things aren't going smoothly and there's no one to assist you. We are here to help.
